Field Note:
In fiscal year 2003, the State expended \$1,674,789 less than what was budgeted for in the category "Infants <1 Year Old" because both the Healthy Start Program and the Newborn Metabolic Screening Program did not fully expend their budgeted allocations.
- 2. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: Children_1_22Expended
Row Name: Children 1 to 22 years old
Column Name: Expended
Year: 2002
Field Note:
In fiscal year 2002, the State expended \$3,726,160 more than what was budgeted for in the category "Children 1 to 22 years Old" because of additional appropriations for the Healthy Start Program and for collective bargaining costs which was not reflected in the budget.
- 3. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: CSHCNExpended
Row Name: CSHCN
Column Name: Expended
Year: 2002
Field Note:
The State expended \$4,203,768 less than what was budgeted in the "CSHCN" category because of a significant backlog in reimbursements from Medicaid for the Healthy Start and Early Intervention Programs.
- 4. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: CSHCNExpended
Row Name: CSHCN
Column Name: Expended
Year: 2003
Field Note:
The category "Children with Special Healthcare Needs" expended \$2,519,791 less than what was budgeted for because of a significant backlog in reimbursements from Medicaid for the Healthy Start and Early Intervention Programs.
- 5. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AllOthersExpended
Row Name: All Others
Column Name: Expended
Year: 2003
Field Note:
The State expended \$1,255,400 more than what was budgeted for in the category "Others" largely due to the following programs receiving appropriations after the fiscal year 2003 grant application had been submitted: a) supplemental budget appropriation for primary care services of which \$550,000 was expended for under this category and b) expenditures of \$358,162 for The Robert Wood Johnson Foundation grant (Hawaii Uninsured Project).
- 6. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AdminExpended
Row Name: Administration
Column Name: Expended
Year: 2002
Field Note:
The State expended \$510,699 less in fiscal year 2002 for the category "Administration" due to the State's imposition of a spending restriction on a \$500,000 grant to the Wahiawa General Hospital for uncompensated and charity care which fell under the Administration's budget.
- 7. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AdminExpended
Row Name: Administration
Column Name: Expended
Year: 2003
Field Note:
The State's expenditures were \$960,808 less than what was budgeted for under the category "Administration" due largely in part to: a) the State's imposition of a spending restriction for Wahiawa General Hospital for uncompensated and charity care; and b) Title V expenditures were less than what was budgeted for in this category.

FIELD LEVEL NOTES

- 1. Section Number:** Main
Field Name: DirectHCExpended
Row Name: Direct Health Care Services
Column Name: Expended
Year: 2002
Field Note:
For the category "Direct Health Care Services," expenditures amounted to \$1,815,035 less than the budgeted amount in fiscal year 2002. The primary reason for this was that although \$2,339,250 was budgeted for the early intervention special fund under the "CSHCN" category, only \$292,350 was actually expended because of a significant backlog in reimbursements from Medicaid for the Healthy Start and Early Intervention Programs.
- 2. Section Number:** Main
Field Name: EnablingExpended
Row Name: Enabling Services
Column Name: Expended
Year: 2003
Field Note:
The State expended \$2,959,823 less than budgeted for under the category "Enabling Services" primarily due to reduced spending by the Healthy Start Program and a significant backlog in reimbursements from Medicaid for the Healthy Start and Early Intervention Programs to pay for services under this category.
- 3. Section Number:** Main
Field Name: PopBasedExpended
Row Name: Population-Based Services
Column Name: Expended
Year: 2002
Field Note:
Under the category "Population Based Services," expenditures amounted to \$1,263,167 more than the budgeted amount in fiscal year 2002. This situation was due to the additional appropriations made for the Healthy Start Program under this category which was not reflected in the fiscal year 2002 budget.
- 4. Section Number:** Main
Field Name: PopBasedExpended
Row Name: Population-Based Services
Column Name: Expended
Year: 2003
Field Note:
Under the category "Population Based Services," expenditures amounted to \$1,209,624 less than the budgeted amounts for fiscal year 2003 because both the Healthy Start Program and the Newborn Metabolic Screening Program did not fully expend their budgeted allocations.
- 5. Section Number:** Main
Field Name: InfrastrBuildExpended
Row Name: Infrastructure Building Services
Column Name: Expended
Year: 2002
Field Note:
Expended amounts for the category "Infrastructure Building Services" was \$1,435,379 less than budgeted for in fiscal year 2002 because the Title V budget was based on the fiscal year 2001 unobligated balance plus the fiscal year 2002 grant award which was much higher than actual personnel costs for this time period.
- 6. Section Number:** Main
Field Name: InfrastrBuildExpended
Row Name: Infrastructure Building Services
Column Name: Expended
Year: 2003
Field Note:
The expended amounts for the category "Infrastructure Building Services" was \$1,281,273 less than what was budgeted for in fiscal year 2003. As a whole, the State's expenditures were less than what was budgeted for in fiscal year 2003 and this is reflective of the amounts expended for "Infrastructure Building Services."

TOTAL	133,071					

FORM NOTES FOR FORM 7

Counts of Individuals Served are not unduplicated across programs. There is no comprehensive system in place that can identify whether an individual or family is enrolled in more than one Title V funded program. The client count does not reflect all programs provided by the Title V agency only those funded by the Federal-State partnership as defined in the guidance and excludes other federally funded programs administered by Title V in Hawai'i including WIC, Federal Healthy Start (Malama A Ho'opili Pono), Centers for Disease Control grants, and Abstinence Education. Programs included in the client count are CSHCN services, Early Intervention, Genetics, Newborn Screening follow-up, Preschool Developmental Screening, Primary Care contracts for underserved, state funded portion of family planning, perinatal support services (including Baby SAFE), family support and development contracts (including Parent Line, respite care, parenting education), Hawai'i Healthy Start, state funded portion of Sex Assault Prevention, and Child and Youth Outreach.

Many of the Title V programs do not track insurance coverage for clients, thus percentages in columns B, D and E were derived by combining figures for programs that do track insurance coverage and estimates of insurance coverage for the unknown clients. Estimates were made using information on Hawai'i insurance coverage from the U.S. Census.

FORM NOTES FOR FORM 9

Hawaii Keiki Information Service System (H-KISS): In 1997 and 1998, calls were tracked by the HEITS data system, which is no longer operational. Data for 1999-2000 are estimates. From 1999, the only calls captured are calls that were actually referred to a program. Calls that were requesting information are not captured. Moreover, the present system is not able to identify and exclude from the count any toll calls originating from the Continental United States.

Data for "The Parent Line" in 2001 is reported by State Fiscal Year (July 2000-June 2001) rather than calendar year. The number of calls decreased during office renovations when only one telephone line was available and during a temporary staff shortage. Finding qualified staffing has been an ongoing problem for Parent-Line

FORM NOTES FOR FORM 11

The Title V agency has meetings scheduled with the Medicaid agency to determine reasons for the discrepancy between the 2003 indicator and the 2002 indicator. Changes in staff and reporting systems may have resulted in the discrepancy, but the problem needs to be identified, so that accurate data can be obtained and reported on an annual basis.

The 2003 indicator is based on the State estimates from SLAITS/National Survey of Children with Special Health Care Needs.
6. **Section Number:** Performance Measure #7
Field Name: PM07
Row Name:
Column Name:
Year: 2005
Field Note:
Data from 1996-1998 reports on immunization series 4:3:1:3. Data from 1999 reports on immunization series 4:3:1:3:3. Data comes from the U.S. National Immunization Survey, CDC. The survey reports the percentage of estimated state vaccination coverage, but does not provide the numerators and denominators used in the calculations. The data from 1999 was revised using the period "coverage among children 19-35 months" rather than the "coverage by 24 months" period. The annual performance objectives were also revised.

An annual pace has been blueprinted to meet the Healthy People 2010 objective for this measure.
7. **Section Number:** Performance Measure #8
Field Name: PM08
Row Name:
Column Name:
Year: 2005
Field Note:
Data is for resident population and is by calendar year. Data for the year 2002 was revised with an updated birth data file. Data for the year 2003 is based on a provisional birth data file.

The indicator data for 2001 and 2002 was updated with the U.S. Census Bureau's age-sex population estimates which were not yet released at the time of last year's application report.

The annual population estimates produced by the U.S. Census Bureau are usually used in reporting population based data for the State of Hawai'i. However, due to the unexpected delays in the releasing of the state age-sex population estimates for the year 2003, the DOH/FHSD population estimation was utilized.
8. **Section Number:** Performance Measure #9
Field Name: PM09
Row Name:
Column Name:
Year: 2005
Field Note:
There is no data available for the year 2002. Data for 2003 was collected, but the analysis of the data is not available at this time. The form will be updated when the data becomes available.

9. **Section Number:** Performance Measure #10
Field Name: PM10
Row Name:
Column Name:
Year: 2005
Field Note:
Data is for resident population and is by calendar year. Due to the small number of motor vehicle deaths, a three-year annual average is being reported.
- Data for the CY 2002 was revised with an updated death data file. Data for the CY 2003 is based on a provisional death data file. The indicator data for CY 2001 and CY 2002 was updated with the U.S. Census Bureau's age-sex population estimates which were not yet released at the time of last year's application report.
- The annual population estimates produced by the U.S. Census Bureau are usually used in reporting population based data for the State of Hawai'i. However, due to the unexpected delays in the releasing of the state age-sex population estimates for the CY 2003, the DOH/FHSD population estimation was utilized.
10. **Section Number:** Performance Measure #11
Field Name: PM11
Row Name:
Column Name:
Year: 2005
Field Note:
Data is by calendar year. The Healthy People 2010 objective has been met by the State's MCH agency. A new array of annual performance objectives were constructed for this measure. Based on the FY 2000 indicator, an annual performance objective of a 2 percent (2%) increase has been blueprinted for this measure.

FY 1999-2002 data for this measure has been updated. The denominators are from the updated birth records (calendar years) minus the infant deaths within one day. The numerators are from the Hawaii HI-TRACK data system of children screened at 13 of 14 hospitals. Children are screened before discharge. Recent screening data from Kaiser Permanete-Hawaii was also added. Kaiser reports summary statistics on their infant hearing data separately since they do not use HI-TRACK.

Column Name:

Year: 2005

Field Note:

Data for the years 1996 to 1999 comes from a study conducted by the DOH Alcohol & Drug Abuse Division. From 1999 report the data for this measure come from Hawaii's Pregnancy Risk Assessment Monitoring System (PRAMS).

The DOH started its Pregnancy Risk Assessment Monitoring System (PRAMS) in June 1999. The data for SPM #03 was changed to take advantage of this newly developed data capacity.

The year 2000 was the first full operational year for Hawaii PRAMS. The 2002 data is the most recent set of data available.

A new array of annual performance objectives have been constructed for this measure. An annual performance objective of a 5 percent (5%) decrease has been blueprinted for this measure.

19. Section Number: State Performance Measure #5

Field Name: SM5

Row Name:

Column Name:

Year: 2005

Field Note:

The data comes from the Hawaii Youth Risk behavior Survey (YRBS). The 1999 survey data is weighted to the general population by the Centers for Disease Control and Prevention (CDC). The 2001 and 2003 survey sample did not meet the CDC requirements for population-based weighting of the data. Thus, 2001 and 2003 results are unweighted and apply only to students participating in the survey and not the general population of public high school students in the state. The 2001 and 2003 data is not comparable to the 1999 weighted data. The numerator and denominator reflect the actual sample results. The survey is conducted every two years.

An annual pace has been blueprinted to meet the Healthy People 2010 objective for this measure.

20. Section Number: State Performance Measure #7

Field Name: SM7

Row Name:

Column Name:

Year: 2005

Field Note:

The data for 2001 was revised. Data reported for this measure is not comparable from year to year due to several changes made by the Department of Human Services (DHS) in their data collection methods and definitions over the years. When DHS resolves current data collection issues, the objectives will be adjusted.

The indicator data for 2001 and 2002 was updated with the U.S. Census Bureau's age-sex population estimates which were not yet released at the time of last year's application report.

The annual population estimates produced by the U.S. Census Bureau are usually used in reporting population based data for the State of Hawaii. Field Note:

This is a new State Performance Measure added in for the five-year report period, FY 2001-2005.

Data for this measure has been updated. The numerators are revised to match the number receiving Early Intervention (EI) services by 6 months as reported on 1998 through 2002 Early Hearing Detection & Intervention (EHDI) federal reports to the Centers for Disease Control. These reports run calendar year. The denominator also is revised to match the number with permanent hearing loss as reported on 1998 through 2002 EHDI federal reports.

The 2003 data is still preliminary because not all EI information is available.

Objectives for FY 2004-2007 were revised based on the updated indicators.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: HI FY: 2005

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce adult (parents, pregnant women) and adolescent substance abuse.
2. Reduce family violence and child maltreatment.
3. Reduce the rate of unintended pregnancy.
4. Improve the dental health of children.
5. Reduce overweight and obesity in children.
6. Improve access to health care.
7. Ensure that all children 0-3 years who are developmentally delayed, or biologically or environmentally at-risk receive needed early intervention services.
8. Ensure that all infants and children receive appropriate and timely hearing evaluation and early intervention services.
9. Assure that parenting support and information is made available to all families with children.
10. Improve assessment and surveillance of MCH populations, including children with special health care needs.

STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: HI

SP # 3

PERFORMANCE MEASURE:

The percent of pregnant women who report use of alcohol, tobacco, and other drugs during pregnancy.

STATUS:

Active

GOAL

To reduce rates of harmful substance use among pregnant women.

DEFINITION

Pregnancy Risk Assessment Monitoring System (PRAMS)

Numerator:

Estimate of women who report use of alcohol, tobacco, and other drugs during pregnancy.

Denominator:

All pregnant women who have delivered a live birth (based on PRAMS data weighted for statewide estimates).

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The data is obtained from Hawaii's Pregnancy Risk Assessment Monitoring System (PRAMS)

SIGNIFICANCE

A range of harmful effects, including spontaneous abortion, low birth weight and preterm delivery have been associated with prenatal use of licit and illicit drugs, alcohol, tobacco, cocaine and marijuana.

SP # 5

PERFORMANCE MEASURE:

The percent of teenagers in grades 9 to 12 attending public schools who report smoking tobacco within the last 30 days.

STATUS:

Active

GOAL

Reduce rates of smoking among youth in grades 9 to 12 years who attend public schools.

DEFINITION

Hawaii Youth Risk behavior Survey (YRBS)

Numerator:

Number of teenagers in grades 9 to 12 who participated in Hawaii Youth Risk Behavior Survey (YRBS) and who reported smoking tobacco within the last 30 days.

Denominator:

Number of teenagers in grades 9 to 12 who participated in the survey (YRBS).

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Hawaii Youth Risk Behavior Survey is administered every 2 years at randomly selected public intermediate and high schools.

SIGNIFICANCE

Smoking tobacco is addictive and is associated with diseases of the respiratory and circulatory systems. Long term use may lead to death. It is therefore important to prevent the onset of smoking among the young.

SP # 7

PERFORMANCE MEASURE:

The rate of confirmed child abuse/neglect reports per 1000 for children aged 0-5 years.

STATUS:

Active

GOAL

To reduce physical violence as a form of discipline to children aged 0-5 year by parents.

DEFINITION

Hawaii Administrative Rules Title 17 - Chapter 920.1 establishes guidelines as to specific forms of child mal-treatment as intended for in HRS 350.1.1(a)

Numerator:

Number of confirmed CPS reports of abuse/neglect for children aged 0-5 years.

Denominator:

Number of children aged 0-5 years in the state.

Units: 1000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Hawaii Department of Human Services Child Protective Services is the source of reports for child/abuse neglect. These reports are given annually. In addition, Child Death Review program will perform additional analysis as to the causes of child death.

SIGNIFICANCE

Child abuse and neglect has pervasive effects. Abuse has negative effects not only on physical health but also on mental, emotional and social health of the child. The effects may not only be short term but also long term following the child into adulthood.

SP # 8

PERFORMANCE MEASURE:

The percent of teenagers in grades 9 to 12 attending public schools who report being involved in a physical fight (within the last 12 months) .

STATUS:

Active

GOAL

Reduce rates of physical violence among teenagers.

DEFINITION

Hawaii Youth Risk behavior Survey (YRBS)

Numerator:

The number of teenagers in grades 9 to 12 who participated in the Hawaii Youth Risk Behavior Survey (YRBS) and who reported involvement in a physical fight (within the last 12 months).

Denominator:

The number of teenagers in grades 9 to 12 who participated in the survey (YRBS).

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Hawaii Youth Risk Behavior Survey is administered every 2 years in randomly selected public intermediate and high schools.

SIGNIFICANCE

Physical fighting among youth is a public health issue because it may lead to injuries and, when extreme, may lead to death. In addition, it may also be symptomatic of mental health problems among youth. In the school setting, physical violence may also affect the learning environment of other students not directly involved in the fights.

SP # 11

PERFORMANCE MEASURE:

The percent of pregnancies (live births, fetal deaths, abortions) that are unintended.

STATUS:

Active

GOAL

To reduce the unintended pregnancy rate.

DEFINITION

Pregnancy Risk Assessment Monitoring System (PRAMS)

Numerator:

Estimate of all unintended births from PRAMS data, similar proportion of all fetal deaths plus all abortions from vital statistics data.

Denominator:

All live births and fetal deaths plus abortions.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The Hawaii PRAMS is the source of estimates of unintended births and the number of total births, fetal deaths and abortions were obtained from vital statistics data. PRAMS data collection was initiated in June 1999 in the form of a survey presented to a sample of new mothers. The unintended birth rates are estimated from data from June to December of 1999.

SIGNIFICANCE

Planned pregnancies are more likely to result in better preterm health of the mothers, lower incidence of low birth weight babies, better health and psychomotor development in early childhood as well as reduced risk of child abuse.

SP # 12

PERFORMANCE MEASURE:

Percent of infants with hearing loss who are receiving appropriate intervention services by age 6 months.

STATUS:

Active

GOAL

To ensure that all infants with hearing loss receive appropriate and timely audiologic evaluation and early intervention services.

DEFINITION

None

Numerator:

Number of infants with hearing loss receiving early intervention services.

Denominator:

Number of infants with hearing loss.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Newborn Hearing Program / Hawaii Early Childhood Hearing Detection and Intervention (HECHDI) Project

SIGNIFICANCE

Significant hearing loss is a common major abnormality present at birth. Appropriate and timely early intervention services before six months of age will promote optimal language, cognitive, and social development.

PERFORMANCE MEASURE:

The percent of teenagers in grades 9 to 12 attending public schools who are overweight.

STATUS:

Active

GOAL

To reduce the percent of teenagers in grades 9 to 12 grade attending public schools who are overweight.

DEFINITION

Hawaii Youth Risk behavior Survey (YRBS)

Numerator:

The number of teenagers in grades 9 to 12 who participated in the Hawaii Youth Risk Behavior Survey (YRBS) and who are overweight based on reported height and weight information and a calculated Body Mass Index (BMI)

Denominator:

The number of teenagers in grades 9 to 12 who participated in the Hawaii Youth Risk Behavior Survey (YRBS)

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

This requires primary data collection, such as screening of a representative sample of school children. If data cannot be collected, source will be the National health Nutrition Examination Survey (NHANES). Projected estimate for state's percentage of obese/overweight children may be as high as 25-30% according to the State Health promotion Branch.

SIGNIFICANCE

The numbers of overweight and obese people are increasing at an alarming rate throughout the U.S. and has now become a major public health concern. National data show that the percentage of young people who are overweight has more than doubled in the past 30 years. Approximately 25-30 percent of children are affected, with many children undiagnosed and untreated. Many diseases are associated with overweight and obesity including high blood pressure, diabetes, coronary heart disease, stroke, gallbladder disease, osteoarthritis, sleep apnea, respiratory problems, some types of cancer, and psychosocial disorders. The health outcomes related to these diseases often can be improved through weight loss, or at a minimum, no further weight gain. The most effective preventive strategies should focus on establishing healthy dietary and physical activity behaviors in childhood.

PERFORMANCE MEASURE:

The percent of families assessed to be at risk for child maltreatment that enroll in Hawaii Healthy Start home visiting support services.

STATUS:

Active

GOAL

Assure that parenting support and information is accessible and available to Hawaii families at risk for child maltreatment.

DEFINITION

Hawaii Healthy Start Program

Numerator:

All families with a newborn to be at risk for child maltreatment that enroll in Hawaii Healthy Start.

Denominator:

All suitable families with newborn who are assessed to be at risk for child maltreatment by Hawaii Healthy Start.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The number of families at risk for child maltreatment and who enroll in Hawaii Healthy Start home visiting services provides a direct measure of parent support/education services. Statewide screening and assessment of all families with infants born in civilian hospitals (Tripler Army Medical Center is excluded) allows a means of identifying those families most in need of parental support and education and where potential for impact/change is greatest. While Hawaii Healthy Start is court mandated to screen, assess, and serve 100% of those families at risk, participation in services is voluntary and compliance is not yet achieved. Healthy start data is regularly analyzed for demographics, outcomes, and gaps in services for program planning.

SIGNIFICANCE

Most parents love their children and tend to believe that if they "raise them right" their children will grow up healthy and become productive members of society. But many families are dealing with the stresses of poverty, overwork, community and family violence, substance abuse, and lack of community resources. These stresses may weaken protective factors such as social support and parents' psychological availability to the child and the ability of the parents to develop a constructive, positive parent child relationship. Some families can become overburdened and at risk for child maltreatment. The Hawaii Healthy Start program identifies the families at most risk and offers strategies that are designed specifically to protect and strengthen parent child relationships, as well as inform, educate, support, and counsel parents to provide the best opportunity to maximize the parenting environment.

PERFORMANCE MEASURE:

The degree to which the MCH agency performs ten essential public health functions, as measured on a scale from 0 to 30.

STATUS:

Active

GOAL

Improve the MCH agency capacity to perform core public health functions.

DEFINITION

The measure uses a checklist of the ten essential public health functions for MCH, which is based on Capacity Assessment for State Title V (CAST-5): 0=minimally adequate to 3=fully adequate. The checklist is attached to the narrative. The MCH staff does a self-assessment to determine the degree to which the agency performs each function.

HEALTHY PEOPLE 2010 OBJECTIVE

Related to Healthy people 2010 Objective 23-11
(Developmental) Increase the proportion of State and local public health agencies that meet national performance standards for essential public health services.

DATA SOURCES AND DATA ISSUES

MCH agency.

SIGNIFICANCE

All public health services depend on the presence of basic infrastructure. Categorical public health programs require health professionals who are competent in cross-disciplinary and technical skills, public health agencies with the capacity to assess and respond to community health needs, and up-to-date information systems. A strong infrastructure provides the capacity to prepare for and respond to both acute and chronic threats to the Nation's health. Public Health continues to transition from direct services to the core public health functions of assessment, policy development and assurance. Capacity building of the public health agencies in this new role is vital to improve the health of the MCH population.

SP # 16

PERFORMANCE MEASURE:

Percent of children 0-3 who are developmentally delayed or biologically/environmentally at risk who receive early intervention services to meet needs specified in their Individual Family Support Plan.

STATUS:

Active

GOAL

To ensure that all children age 0-3 years who are developmentally delayed, or biologically or environmentally at risk receive needed early intervention services.

DEFINITION

None

Numerator:

Number of Part C children receiving early intervention services to meet needs specified in their Individual Family Support Plan (IFSP)

Denominator:

Number of Part C children (December 1 count)

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Children with Special Health Needs Branch / Early Intervention Section monthly reports from early intervention programs.

SIGNIFICANCE

Early intervention services are mandated by part C of the Individuals with Disabilities Education Act (IDEA) which is a federal grant program to assist states in operating a comprehensive statewide program of early intervention services for infants and toddlers with special needs ages birth through 2 years, and their families. Early intervention services: - enhance the development of infants and toddlers with disabilities. - reduce the educational costs by minimizing the need for special education through early intervention - minimize the likelihood of institutionalization, and maximize independent living. - enhance the capacity of families to meet their child's needs.

Asthma defined by primary ICD9 codes 493.xx. Hawai'i residents only. Excludes newborns, pregnancy-related admissions and patients admitted through a transfer from another facility. The 2002 estimation reported last year was revised with 2002 hospital data. Data reported for 2003 is provisional and does not include data from one major provider on the island of Kaua'i. The data will be updated next year and will include all state providers.

The indicator data for 2001 and 2002 was updated with the U.S. Census Bureau's age-sex population estimates which were not yet released at the time of last year's application report.

The annual population estimates produced by the U.S. Census Bureau are usually used in reporting population based data for the State of Hawai'i. However, due to the unexpected delays in the releasing of the state age-sex population estimates for the year 2003, the DOH/FHSD population estimation was utilized.

FORM NOTES FOR FORM 18

Currently, there are no linkages between the birth certificate data files and the Medicaid data files. An new office has been established within the Department of Health, the Public Health Informatics Project, to coordinate the development of the Hawai'i Health Data Warehouse (HHDW) and to facilitate data linkage activities among other government and private agencies. Funding and staff has been provided to facilitate and promote the divisions interests in the data linkage efforts. Work is progressing, the warehouse concept phase has been completed and they are moving through their next phase. Efforts are still focusing on Department of Health data and have not yet moved to external agency data, as Medicaid. However, discussions have begun with the Hawai'i State Department of Human Services concerning linkage with their data.

In 2000, our CSHCN program began to implement a program to link birth records to newborn screening data. Initial results were encouraging. We were starting to refine our data linkage strategy and programming algorithms when our Attorney General's Office issued a ruling prohibiting data linkage for follow-up contact purposes. However, it is permissible for us to gain identifiable data from birth records for research purposes. Still, the response by Hawaii's vital statistics program was to prohibit any identifiable data from leaving their office. At the time of the decision, data for the first three quarters of 2003 had been linked. Data needed for the last quarter was halted. Efforts are in progress to see if some of the issues can be resolved.

Data is for resident population and is by calendar year. Data for the year 2002 was revised with an updated death data file. Data for the year 2003 is based on a provisional death data file.

The indicator data for 2001 and 2002 was updated with the U.S. Census Bureau's age-sex population estimates which were not yet released at the time of last year's application report.

The annual population estimates produced by the U.S. Census Bureau are usually used in reporting population based data for the State of Hawaii. However, due to the unexpected delays in the releasing of the state age-sex population estimates for the year 2003, the DOH/FHSD population estimation was utilized.

The reported data maybe too small to calculate reliable measures. Unstable measures are not useful in making decisions. Caution should be exercised in the analysis of the data of the reported data.
