FORM 2
MCH BUDGET DETAILS FOR FY 2005

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: AR

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 7,666,081

A.Preventive and primary care for children:

\$ 2,909,382 (37.95%)

B.Children with special health care needs:

\$ 2,402,396 (31.34%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 360,425 (4.7%)

(The above figure cannot be more than 10%) [Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 58,407

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 7,431,977

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 0

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 15,264,743

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 5,797,136

\$ 22,696,720

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 30,421,208

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 104,471

c. CISS: \$ 142,817

d. Abstinence Education: \$ 600,004

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 72,857,861

h. AIDS: \$ 0

i. CDC: \$ 1,114,042

j. Education: \$ 0

k. Other: \$ 0

CMS Medical Home \$ 3,240,558

HRSA \$ 325,565

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 78,385,318

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 108,806,526

FORM NOTES FOR FORM 3

None

FIELD LEVEL NOTES

1. **Section Number:** Main
Field Name: FedAllocExpended
Row Name: Federal Allocation
Column Name: Expended
Year: 2002
Field Note:
CMS expenditures less than expected due to fluctuations in programmatic activity. ADH expenditures reduced as a result of dropping Nurse Home Visiting program.
2. **Section Number:** Main
Field Name: FedAllocExpended
Row Name: Federal Allocation
Column Name: Expended
Year: 2003
Field Note:
Declining caseloads in ADH Local Health Units resulted in decreased spending in FY2003.

Children's Services eligibility criteria changes, both financial and age eligibility, resulted in decreased caseloads. This coupled with prolonged electronic billing problems for providers resulted in decreased spending.
3. **Section Number:** Main
Field Name: UnobligatedBalanceExpended
Row Name: Unobligated Balance
Column Name: Expended
Year: 2002
Field Note:
CMS carryover less than projected in 2002 budget.
4. **Section Number:** Main
Field Name: UnobligatedBalanceExpended
Row Name: Unobligated Balance
Column Name: Expended
Year: 2003
Field Note:
Declining caseloads in ADH Local Health Units resulted in decreased spending in FY2003.
5. **Section Number:** Main
Field Name: StateMCHFundsExpended
Row Name: State Funds
Column Name: Expended
Year: 2002
Field Note:
State expenditures exceeded anticipated budgeted amount for both ADH and CMS.
6. **Section Number:** Main
Field Name: StateMCHFundsExpended
Row Name: State Funds
Column Name: Expended
Year: 2003
Field Note:
Declining caseloads in ADH Local Health Units resulted in decreased spending in FY2003.
7. **Section Number:** Main
Field Name: OtherFundsExpended
Row Name: Other Funds
Column Name: Expended
Year: 2002
Field Note:
Expenditures declined from Comprehensive School Health Contract between ADH and Arkansas Department of Education, due to vacant position. Other Funds expenditures were reduced from \$990,686 to \$552,114, primarily due to reductions in media purchasing for Medicaid Outreach and Education.
8. **Section Number:** Main
Field Name: OtherFundsExpended
Row Name: Other Funds
Column Name: Expended
Year: 2003
Field Note:
Contract with Arkansas Department of Education for Comprehensive School Health. Expired in 2003.
9. **Section Number:** Main
Field Name: ProgramIncomeExpended
Row Name: Program Income
Column Name: Expended
Year: 2002
Field Note:
Expenditure of program income of \$15,268,452 was less than the \$16,066,872 budgeted, due to the inclusion of existing fund balances in the Family Planning Medicaid budget.
10. **Section Number:** Main
Field Name: ProgramIncomeExpended
Row Name: Program Income
Column Name: Expended
Year: 2003
Field Note:
Children's Services budgeted for program income via case management billing to Medicaid in the amount of \$2.5 million. The actual amount received from Medicaid for case management was \$1.2 million. Budget adjustments due to the decreased revenue were required in the form of changes in eligibility criteria.
11. **Section Number:** Main
Field Name: OtherFedFundsExpended
Row Name: Other Federal Funds
Column Name: Expended

Year: 2002

Field Note:

The loss of EPSDT screening as a major revenue source for ADH resulted in loss of Medicaid income. EPSDT was discontinued July 2001, due to falling revenue. Other Federal Funds expended were slightly less than the \$5,439,600 budgeted, primarily due to a decline in the expenditure of federal abstinence funds.

12. **Section Number:** Main

Field Name: OtherFedFundsExpended

Row Name: Other Federal Funds

Column Name: Expended

Year: 2003

Field Note:

Expenditures over budget largely the result of increased WIC allocation.

FIELD LEVEL NOTES

- 1. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: PregWomenExpended
Row Name: Pregnant Women
Column Name: Expended
Year: 2003
Field Note:
Decreased caseload, resulting from more women seeking prenatal care from private providers, resulted in lower expenditures for direct and enabling care to pregnant women.
- 2. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: Children_0_1Expended
Row Name: Infants <1 year old
Column Name: Expended
Year: 2003
Field Note:
Movement away from EPSDT and well-child clinic services resulted in lower expenditures to ages 1-22. Concentration on immunizations moved the majority of child health activity to under 1 age group. As activities in Infant Hearing and Vision became more targeted to population-based screening, activities moved toward infants, away from older children.
- 3. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: Children_1_22Expended
Row Name: Children 1 to 22 years old
Column Name: Expended
Year: 2003
Field Note:
Movement away from EPSDT and well-child clinic services resulted in lower expenditures to ages 1-22. Concentration on immunizations moved the majority of child health activity to under 1 age group. As activities in Infant Hearing and Vision became more targeted to population-based screening, activities moved toward infants, away from older children.
- 4. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: CSHCNExpended
Row Name: CSHCN
Column Name: Expended
Year: 2002
Field Note:
Expenditures increased to deplete carry-over.
- 5. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: CSHCNExpended
Row Name: CSHCN
Column Name: Expended
Year: 2003
Field Note:
This is the year that CMS transitioned within the Department of Human Services Division of Medical Services to the Division of Developmental Disabilities. Due to decreased program revenue from Medicaid reimbursement for case management, program eligibility criteria was changed by lowering financial eligibility to 185% of the Federal Poverty Level and lowering age eligibility from 21 years to 18 years. This decreased the expenditures.
- 6. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AllOthersExpended
Row Name: All Others
Column Name: Expended
Year: 2003
Field Note:
As other revenue sources declined, more emphasis was placed on Title X and Medicaid Family Planning Services. Expenditures moved to the larger revenue sources.
- 7. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AdminExpended
Row Name: Administration
Column Name: Expended
Year: 2002
Field Note:
MCH administration decreased at ADH, as more administrative costs were charged to other programs.
- 8. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AdminExpended
Row Name: Administration
Column Name: Expended
Year: 2003
Field Note:
As revenue declined, and positions were vacant and not refilled, administrative expenses declined markedly from previous years. Also, the reorganization had the effect of many staff changing to state budgets that are not connected directly to MCH activities.

FIELD LEVEL NOTES

- 1. Section Number:** Main
Field Name: DirectHCExpended
Row Name: Direct Health Care Services
Column Name: Expended
Year: 2002
Field Note:
ADH did not provide EPSDT screening services in FY2002 which decreased direct service provision. Direct Health Care Services was the predominant type of service provided through MCH. A minimal decline in these services was primarily due to loss of EPSDT revenue, and a movement of MCH activity toward infrastructure-building services, primarily Hometown Health. At the same time, more CMS activity was directed away from enabling services and infrastructure building toward direct services.
- 2. Section Number:** Main
Field Name: DirectHCExpended
Row Name: Direct Health Care Services
Column Name: Expended
Year: 2003
Field Note:
ADH has made a concerted effort to redefine budget to distinguish direct services from enabling services and population-based services. Also, numbers are affected by caseload declines across programs in FY 2003.

Movement of state match away from well-child clinics to immunization clinics moved nearly \$3 million in expenditures from direct services to population-based services.

ADH identified expenditures for health education and other enabling services that had previously been counted as direct services. This included surveying staff regarding the amount of time expended in family planning and maternity offices visits that was directed toward health education and other enabling services, as opposed to the direct provision of health care services. This moved about one-third of staff time for family planning and about forty percent of staff time for maternity to enabling.
- 3. Section Number:** Main
Field Name: EnablingExpended
Row Name: Enabling Services
Column Name: Expended
Year: 2002
Field Note:
Enabling services increased due to CMS providing case management.
- 4. Section Number:** Main
Field Name: EnablingExpended

- 7. Section Number:** Main
Field Name: InfrastrBuildExpended
Row Name: Infrastructure Building Services
Column Name: Expended
Year: 2003
Field Note:
Expenditures for infrastructure-building at ADH were less than expected because, as revenue declined, staff performing infrastructure-building activities (Hometown Health Initiative, in particular) were moved to state budgets that could not be captured as MCH-related. These activities are ongoing, but cannot be captured as part of the MCH budget at this time.

TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2005
[SEC. 506(A)(1)]
STATE: AR

1. State MCH Administration:
(max 2500 characters)

The Arkansas Department of Health (ADH) is a centralized state agency that oversees public health operations in all seventy-five counties in the state through five regions and ninety-four local health units. Title V is administered by the Maternal and Child Health Team of the ADH's Statewide Services, Public Health Programs Group. The Children with Special Health Care Needs program (CSHCN) is administered by the Division of Developmental Disabilities Services, Children's Medical Services, Arkansas Department of Human Services. The services within Title V's administrative control include: Children with Special Health Care Needs programs, Newborn Screening, Adolescent Health, School Health, SIDS, Child Health Clinic Services, Injury, Fire and Burn Prevention, Child Health Support Services, Maternity Services, Nurse Midwife Project, Perinatal Outreach, Lay Midwife Project, Infant Mortality Initiatives, Pap Smear Follow-up, Family Planning, Hearing, Speech and Vision Screening, Oral Health, WIC and Breastfeeding Services.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ <u>7,666,081</u>
3. Unobligated balance (Line 2, Form 2)	\$ <u>58,407</u>
4. State Funds (Line 3, Form 2)	\$ <u>7,431,977</u>
5. Local MCH Funds (Line 4, Form 2)	\$ <u>0</u>
6. Other Funds (Line 5, Form 2)	\$ <u>0</u>
7. Program Income (Line 6, Form 2)	\$ <u>15,264,743</u>
8. Total Federal-State Partnership (Line 8, Form 2)	\$ <u>30,421,208</u>

9. Most significant providers receiving MCH funds:

Arkansas Children's Hospital

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	<u>14,549</u>
b. Infants < 1 year old	<u>37,961</u>
c. Children 1 to 22 years old	<u>34,989</u>
d. CSHCN	<u>18,092</u>
e. Others	<u> </u>

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

CMS pays for direct medical services for eligible conditions for approximately 250 CSHCN that do not receive Medicaid benefits. CMS also pays for limited services for Medicaid recipients who qualify medically for CMS. The services paid for by CMS are not covered under the Medicaid state plan and have included purchase of IPV machines, van lifts and wheelchair ramps for homes. CMS staff members provide case management services for CSHCN whose families have requested this assistance. Automated, comprehensive Needs Assessments and Service Plans are completed after interviews with the families have been completed. The Medicaid home and community-based waiver to provide respite care for clients on both CMS and Medicaid started 11/1/02, and about 230 CSHCN and their families are currently being served. CMS has been trained by Part C Early Intervention staff to provide case coordination under Part C for children whom both programs served. It is anticipated that over the next year, CMS will become an initial intake point for Early Intervention services for CSHCN. Transition surveys are sent to all children in the month that they turn age 14 to assess current activities taking place related to transition and to help focus the youth and families' attention on the future planning that needs to be done in this area.

b. Population-Based Services:
(max 2500 characters)

CMS continues distribution of the quarterly newsletter to over 15,000 families of CSHCN. CMS received a Medical Home grant through MCHB and training of Pediatricians and Family Practice physicians has started in target sites Statewide. This training will benefit not only the CSHCN that are treated by these physicians, but typical children who are also receive their primary care from those physicians.

c. Infrastructure Building Services:
(max 2500 characters)

CMS staff is active around the state in various capacities that assist in building networks of care and services. These include, serving on Together We Can teams (a local multi-agency team working with individual families in need of services from more than two agencies and needs that cannot be met by those agencies) and the statewide Together We Can Council; serving on Interagency Coordinating Council for Early Intervention (CMS Nursing Supervisor and Medical Director are members.); Medical Home Committee (Medical Director, Program Director, Grants Coordinator and Parent Involvement Coordinator); Genetics Services Advisory Committee; Oral Health Advisory Committee; staff serve as resource personnel in UAMS Dept of Pediatrics Habilitation Clinics held throughout the state and relationships with state and local Department of Education programs (3 to 5 programs and Special Education Cooperatives).

12. The primary Title V Program contact person:

Name Richard Nugent, M.D.
 Title Medical Director, MCH

13. The children with special health care needs (CSHCN) contact person:

Name Nancy Holder
 Title Program Administrator

FORM NOTES FOR FORM 10

None

FIELD LEVEL NOTES

1. **Section Number:** Most significant providers receiving MCH funds

Field Name: ProviderFund1

Row Name:

Column Name:

Year: 2005

Field Note:

Children's Services pays for specialty care for cshcn and Arkansas Children's Hospital is the only pediatric tertiary care center in the state.

FORM 11
TRACKING PERFORMANCE MEASURES
[SECS 485 (2)(2)(B)(iii) AND 486 (A)(2)(A)(iii)]
STATE: AR

PERFORMANCE MEASURE # 01

The percent of newborns who are screened and confirmed with condition(s) mandated by their State-sponsored newborn screening programs (e.g. phenylketonuria and hemoglobinopathies) who receive appropriate follow up as defined by their State.

<u>Annual Objective and Performance Data</u>

FORM NOTES FOR FORM 11

Arkansas has slowly been making a transition from nearly all immunizations being given in local health departments to a shared service in which both local health units and local primary care physicians are giving shots. ADH is developing a computer-based immunization registry. The agency is now just accomplishing the data entry for reports from private physicians into the data set. We believe that the observed decline in age-appropriate immunizations may be as much related to this shift in place of service and data collection. That answer will become clearer as the system of immunization services adjusts to the changes.

64.9 is the weighted immunization rate.

RESPONSE TO 2005 APPLICATION REVIEW

Not all private providers may be submitting data to the immunization registry, which is the source of this data.

We will improve the data, by identifying the number of private providers participating in the registry and compare that with the number of providers participating in the ARkids (Arkansas's State Health Insurance program for Children).

Promote participation in the immunization registry by the private providers through the monthly immunization newsletter

7. **Section Number:** Performance Measure #8
Field Name: PM08
Row Name:

RESPONSES TO 2005 APPLICATION REVIEW

The sample size for the 2003-2004 years was much larger compared to the other years and hence the change.

9. **Section Number:** Performance Measure #10
Field Name: PM10
Row Name:
Column Name:
Year: 2005
Field Note:
RESPONSE TO REVIEW OF 2005 APPLICATION:

There was a significant decrease in the motor vehicle death rate for children aged 14 and under between 2001-2002. Several events have occurred during this timeframe to explain the gap. The Arkansas Child Passenger Protection Act was strengthened in 2001 to include all children up to the age of 15. This new act required that children under 6 years of age or under 60 lbs must be restrained in an appropriate child safety seat. From the age of 6 years or over 60 lbs up to the age of 15, a seat belt would be sufficient. This has strengthened the previous law which only protected children up to 4 years of age or 40 lbs.

The Highway Safety Office through the Arkansas State Police and local law enforcement conducted several "Click It or Ticket" enforcement programs from 2001-2002 to encourage seat belt use.

Additionally 7 child passenger safety certification trainings sponsored by the National Highway Traffic Safety Administration were conducted throughout the state during that year with over 100 new technicians certified. Because it is provisional data, the increase is not statistically significant.

10. Section Number: Performance Measure #11

Field Name: PM11

Row Name:

Column Name:

Year: 2005

Field Note:

59.7% of Arkansas moms attempted breastfeeding in 2001 - 20466/34273

27.5% of those who initiated breastfeeding continued for one month or less. 5633/20466

8.5% of those who initiated breastfeeding continued for less than one week. 1730/20466

Arkansas PRAMS: 59.7% of moms at least attempted breastfeeding in 2001. That does not necessarily mean they were still breastfeeding at the time of hospital discharge. The question is worded as follows:

Did you ever breastfeed or pump breast milk to feed your new baby after delivery? No Yes

2002 and 2003 data are not yet available.

Field Note:

RESPONSE TO 2005 APPLICATION REVIEW

2001 data are estimates from the Arkansas Center for Health Improvement (ACHI) AR Household Survey of Health Insurance Coverage.

As of June 2004 the number ARKids First 'B' Eligibles was 65,789.

The 2001 Arkansas Household Survey of Health Insurance Coverage was a telephone survey over a 6-month period (2/27/01-8/27/01) that yielded 2,572 household interviews, collecting data regarding 6,596 individuals in Arkansas that provided new state-level and regional-level estimates of the insured and uninsured adults and children in Arkansas. Questions were also included in the survey to accurately classify households according to federally or state-supported insurance programs. Household income and assets determine eligibility for Arkansas's Medicaid program, including ARKids First, ConnectCare, and Medicaid-eligible Medicare beneficiaries.

13. Section Number: Performance Measure #14

Field Name: PM14

Row Name:

Column Name:

Year: 2005

Field Note:

RESPONSE TO 2005 APPLICATION REVIEW.

The data has been corrected.

The numerator is 361,855 of eligible children who have received services

The denominator is 365,811 of children who are potentially eligible.

Thus the number of eligible kids who have received services continues to be reassuring. The definitions of these numbers as specified in this application have been attended to as closely as possible. Having said that, it is important to note that ADH staff have no detailed access to the numerical information and can not offer further explanation of the observed trends. The MCH staff regards this as an opportunity to develop a better partnership with DHS around data sharing. Our need has less to do with technical competence, than developing better partnering behavior between our two large institutions. Led by Senior Staff members, ADH and DHS have a coordinating committee that is aware of these interests. The new Project ANGELS, described elsewhere in this application has generated some very specific data collaboration between our agencies. That good will can be applied to other data issues, including this one.

19. **Section Number:** State Performance Measure #21

Field Name: SM21
Row Name:
Column Name:
Year: 2005
Field Note:

The YRBS reports the unweighted percent as 51.9 using 696 that answered "yes" as the numerator and 696 answering "yes," plus the 646 answering "no" as the denominator. 76 did not answer the question. 46 of the 93 sampled schools participated and 1351 of the 1593 students surveyed returned a usable questionnaire giving an overall response rate of 42%. It appears that our school response rate is much lower than it was in '97 (65%). This is the only year a response rate can be found for since the CDC has changed their YRBS website. One can't get the same data anymore.

Arkansas
Total Female Male
Year
2001 55.5 (±6.2) 53.3 (±6.8) 57.8 (±6.3)
1999 55.9 (±5.1) 56.6 (±5.6) 55.3 (±5.8)
1997 59.7 (±5.0) 57.5 (±4.8) 61.9 (±5.8)
1995 61.5 (±3.9) 59.6 (±4.4) 63.4 (±4.4)

The state plans to make the greatest impact in promoting abstinence by reducing adolescent and premarital sexual behavior, to be competitive for the bonus award for the 50 states, and to meet the required mandates of the Welfare Reform Plan. The RFP gives priority for funding to those applicants that have the most sound and reasonable application, and that serve populations with high numbers of out-of-wedlock and teen births. Priority in funding will be given to communities which rate in the top 20 of Arkansas' 75 counties in the annual average number of births to unwed teens during the past five years.

Despite the data concerns discussed above, the observed decline in the percent of adolescents having sex is still somewhat encouraging. A great deal of effort has been made in Arkansas to address adolescent sexuality. The Abstinence program is only one. Pubic awareness efforts have been numerous over the last 15 years including the Arkansas Time Bomb (early 90s), and in resurgence of interest in STD issues such as HIV/AIDS and a recent syphilis outbreak in the northwest part of our state. In addition, the Hometown Health Improvement effort has galvanized many local groups to attend many health issues. Prevalent among those interests is the topic of adolescent pregnancy.

Teen pregnancy is a phenomenon of social and cultural variation that tends to wax and wane over a period of decades. There is no simple explanation of the observed trends.

20. **Section Number:** State Performance Measure #22

Field Name: SM22
Row Name:
Column Name:
Year: 2005
Field Note:
The number on this week's (06-16-04) report of ARKids First 'B' Eligibles is 65,789.

RESPONSE TO 2005 APPLICATION

The data comes from Arkansas's Department of Human Services. Arkansas has ARKids First plans A and B that have different eligibility criteria for enrollment.

As much as ADH staff appreciate access to this data through the DHS web page, it provides little discernment of the detailed analysis behind the numbers. As such we have little ability to comment intelligently on the observed trends. This issue, like the data for Performance Measure 14, represents a challenge and an opportunity to enhance the partnership between ADH and DHS on data sharing. We have several committees addressing those issues. We do not perceive a need for technical assistance, as our technical data management capabilities are quite good. We just need time to further develop the partnership. It is happening.

21. **Section Number:** State Performance Measure #24

Field Name: SM24
Row Name:
Column Name:
Year: 2005
Field Note:
2002 and 2003 data are not available.

For 2001, The survey indicated that 70.4 % of respondent women received counseling. Applying that percent (70.4) to the weighted number of births for the year (34273) gives a number counseled of 24,128, apparent declines both in number and percent since 2000.

For 2001, the survey showed that 74.3% of moms stated that they received a test for HIV at some time during their most recent pregnancy or delivery - apparent declines in both number and percent since 2000.

RESPONSE TO 2005 APPLICATION REVIEW

The declines in number of tested and counseled mothers are programatically significant. ADH communicates through a weekly newsletter with all doctors. We will use that

avenue of communication to encourage OBGYNs and FPOBs to assure both counselling and testing. It is probable, however, that because HIV testing has become so automatic, patients may be less aware they have experience either counseling or testing.

The data come from 730 of Arkansas' 1,139 schools. Out of 316 school districts, 265 have data included in this report. These students are distributed across 67 of 75 Arkansas counties.

RESPONSE TO 2005 APPLICATION REVIEW

2005/Healthy Arkansas Initiative

Governor Mike Huckabee launched the Healthy Arkansas Initiative on May 4, 2004. The Initiative will use existing resources and funding sources to provide information and create incentives to convince Arkansans to give up unhealthy habits.

The Healthy Arkansas Initiative targets state employees, Medicaid recipients and other Arkansans. The Governor has charged both Dr. Fay Boozman, director of the Department of Health (ADH) and Kurt Knickrehm, director of the Department of Human Services (DHS) to achieve specific goals among the targeted populations.

ADH has been directed to achieve specific goals by January 2007 to increase rates of physical activity among children and adults, reduce overweight and obesity rates among children and adults and reduce rates of smoking among adolescents and adults.

DHS was directed to develop a pilot project to attempt to improve health behaviors among the approximate 600,000 Arkansans who receive Medicaid benefits. Input on how healthy habits should be rewarded has been requested from a number of groups, including the Arkansas State Employees Association.

Another component of Healthy Arkansas focuses on worksite wellness. On April 29, the Governor invited business leaders statewide to attend a meeting to discuss fiscal impacts of changing unhealthy behaviors including:

Financial and lifestyle incentives offered to employees to live a healthier life;

Determining why employees are overweight, not exercising or smoking;

Defining the true cost to our state due to unhealthy lifestyle; and

Determining the health problems that can be changed by behavior change

Governor Huckabee has asked for involvement from the business community on the front-end to make these issues a priority. He stressed that creating a healthier workforce is a fiscal issue and will result in fewer sick days, increased productivity and lower health insurance costs. The Governor is seeking concepts and best practices that impact healthcare that have worked for one company to share with a larger audience.

The Healthy Arkansas Initiative will be a focus of Governor Huckabee's administration during the next 32 months. The Initiative creates an ongoing effort to change Arkansas from one of the unhealthiest states in the country to one of the healthiest.//2005//

FORM NOTES FOR FORM 12

None

FIELD LEVEL NOTES

1. **Section Number:** Outcome Measure 1

Field Name: OM01

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data for 2003 indicate an increase in infant mortality rate for Arkansas. This increase is all due to neonatal mortality among births other than African American births. Post neonatal and fetal mortality for both races are unaffected or improved. This change is consistent with increases in low birthweight rates in Arkansas which reflect similar changes nationally. Increasing LBW rates in AR have been putting "upward pressure" on neonatal mortality rates for many years now in both the state and the nation. AR is now working even harder on this issue through the development of the ANGELS program which is a statewide effort to provide obstetrical consultation and referral for high risk pregnant women.

2. **Section Number:** Outcome Measure 2

Field Name: OM02

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data are provided.

Improvement in the ratio between black and white infant mortality appear to be improved for Arkansas This "improvement" unfortunately hides an increase in the white neonatal mortality rate, rather than reflecting a decline in the African American rates. These trends are not inconsistent with national trends. The observed increase in low birthweight rates in AR and nationally are under study at this time. While fertility treatments are more common and are resulting in more multiple births, the LBW increase is not completely explainable by this rationale. Also, the increase in prematurity can not be ascribed to the problem of adolescent pregnancy, since both adolescent birth rates and the percent of all AR births that are to adolescents have declined. One remaining explanation is that as women defer pregnancy into their later reproductive years, they increase their risk for LBW. We have yet to assess that hypothesis with care.

3. **Section Number:** Outcome Measure 3

Field Name: OM03

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data are provided.

The increase in neonatal mortality rate is clear and consistent. A trend toward increased LBW rates has preceded this increase for many years. We are studying this phenomenon in AR, and will be very aware of national investigations of this issue, as many other states are experiencing the same phenomenon.

4. **Section Number:** Outcome Measure 4

Field Name: OM04

Row Name:

Column Name:

Year: 2005

Field Note:

Calendar year data are provided.

While CY data are provisional, the Arkansas Center for Health Statistics is confident that this number will not change substantially in final statistics. There is no statistically significant difference between the 2002 and 2003 data as collected so far, although the 2001 to 2002 change is significant. It appears that the 2001 postneonatal rate was slightly but unusually elevated compared to earlier and later data. However, the fact that the 2002 and 2003 rates have not changed, means that the increase in neonatal mortality rate is therefore observable in the overall infant mortality rate.

Arkansas's post neonatal mortality rate has, until now, been of more concern to public health than its neonatal mortality rate, as the PNM rate has always been much elevated compared to the nation's, while the NMR has been close to the national rate. We will not lose sight of this concern as we turn to dealing with the low birthweight problem.

5. **Section Number:** Outcome Measure 5

Field Name: OM05

Row Name:

Column Name:

Year: 2005

Field Note:

Despite the increase in neonatal mortality rate, the perinatal mortality rate has gratifyingly declined. Thus the fetal mortality rate has improved. Arkansas's new Project ANGELS is dedicated to improving perinatal outcomes by earlier consultation and referral for prenatal medical complications and risk factors.

6. **Section Number:** Outcome Measure 6

Field Name: OM06

Row Name:

Column Name:

Year: 2005

Field Note:

No 2003 population estimates available 06-24-04.

The decline in child death rates is consistent with declines in deaths due to motor vehicle accidents. A number of legal and programmatic activities have perhaps contributed to this gratifying result. They are explained in other performance measure responses.

Year: 2005
Field Note:
This rating is made by the Parent Advisory Council for Title V.
- 3. Section Number:** Main
Field Name: Question3
Row Name: #3. Family members are involved in the Children with Special Health Care Needs...
Column Name:
Year: 2005
Field Note:
This rating is made by the Parent Advisory Council for Title V.
- 4. Section Number:** Main
Field Name: Question4
Row Name: #4. Family members are involved in service training of CSHCN staff and providers.
Column Name:
Year: 2005
Field Note:
This rating was done by the Parent Advisory Council for Title V. PAC members have been involved in training of Title V staff in regional and state meetings as well as training of physicians and staff at Arkansas Children's Hospital at Grand Rounds for a Project DOCC (Delivery of Chronic Care) activity.
- 5. Section Number:** Main
Field Name: Question5
Row Name: #5. Family members hired as paid staff or consultants to the State CSHCN program...
Column Name:
Year: 2005
Field Note:
This rating was done by the Parent Advisory Council for Title V. There is one parent hired solely for his position as a parent of a child with special needs; however, there are several more professional staff who are parents of children with special needs. When hired, the fact that these workers had children/youth with special needs was considered in their hiring rating among other applicants.
- 6. Section Number:** Main
Field Name: Question6
Row Name: #6. Family members of diverse cultures are involved in all of the above activities
Column Name:
Year: 2005
Field Note:
This rating was done by the Parent Advisory Council. This has been a difficult area for the council. African American parents are under-represented on the council although several have been members over the years. The dropout rate is high due to outside factors (such as their own health problems). We have been unable to locate potential participants from the Hispanic community partly because of the Council by-laws related to membership requirements (one member representative for an area of the state). These issues will be discussed during the next year.

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: AR FY: 2005

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women," and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Percent of births to unmarried teens ages 15-17.
2. Percent of Arkansas high school students who have engaged in sexual intercourse.
3. Percentage of children through age 18 and below 200 percent of poverty enrolled in AR Kids First health insurance program. (ARKids numbers with improved data)
4. Percent of pregnant women counseled for HIV testing.
5. Percent of overweight among WIC children birth to age five.
6. Percent of 14-15 year olds on CMS who state that CMS transition services have helped improve their knowledge/ability to transition into adult life.
7. Percent of parent responding on the Parent Satisfaction Survey that CMS service coordination teams told them about other services available to them.
8. Act 1220 - Baseline BMI dataPercent of public school students overweight greater than 95th percentile.
9. Act 1220 - Baseline BMI dataPercent of public school students at risk of overweight (85-95th percentile)
10. Percent of women smoking during pregnancy.

FORM NOTES FOR FORM 14

These priorities continue to be those addressed by this five-year cycle of the MCH Block Grant for Arkansas.

Other priorities stated elsewhere in the application are primarily those of the Department of Health as a whole, and represent the policy context in which this Block Grant report is being made.

Comments on the state's progress toward these priorities appear below:

1. The percent of births to unmarried teens has gratifyingly declined, consistent with the overall decline in adolescent births and birth rates.
2. The percent of AR high school students who have engaged in sexual intercourse appear also to have declined. Though we have some questions about the data, this finding is consistent with overall adolescent birth trends.
3. The percent of AR low income kids through 18 that are enrolled in AR Kids First has declined. We ascribe that decline to improvements in the program data as well as the ability to share that data between ADH and DHS. However, we continue to work on strengthening the partnership between our agencies at data sharing.
4. The percent of pregnant women counseled for HIV testing, shows a decline from 76.5% in 2000 to 70.4% in 2001. That decline is statistically significant. Perceiving the reality of this trend is difficult. Arkansas's recent law requiring doctors to test, but not necessarily to counsel, has made the testing process more automatic, so patients are less aware of both the counseling and testing processes. The testing data show a decline in the percent tested (77.5 to 74.3) about half of which is explained by the "not tested" answer and half by the "don't know" answer. Thus, it appears that slight declines in both testing and counseling are occurring. MCH staff will follow this trend for one more year. If it continues, we will make an effort to increase professional awareness of this trend.
5. The percent of overweight WIC children birth to age 5 continues to increase. Act 1220 and its focus on measuring BMI among school children brings attention to the problem for all children. WIC is redoubling its efforts to improve diet and exercise among its clients as part of the Healthy Arkansas program initiative.
6. The percentage of respondents to the Parent Satisfaction Survey stating that CMS had increased their knowledge and ability to transition to adult life increased. This increase is attributed to technical assistance received over the past year through MCHB.
7. There was a slight decrease in the number of parents stating that CMS service coordinators told them about other services available. This will be addressed in training.
- 8 and 9. Act 1220 continues to be vigorously developed. As of the end of August, nearly all school systems had reported their BMI measurements. Overweight greater than the 95 percentile in the latest reported data stands at 21% of kids. The state is now reacting to that finding.
10. Percent of women smoking during pregnancy

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: AR

SP # 21

PERFORMANCE MEASURE:

The percent of Arkansas high school students who have engaged in sexual intercourse.

STATUS:

Active

GOAL

Reduce the percentage of students grades 9 through 12 who have engaged in sexual intercourse.

DEFINITION

Numerator:

Number of youth grades nine through twelve engaging in sexual intercourse. (Weighted data from the YRBS)

Denominator:

Total number of youth grades nine through twelve enrolled in Arkansas public schools in 1997. (133,446)(Arkansas Department of Education 1997 Enrollment Report.)

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

1997 YRBS data. A total of 63 schools involving 2,296 students were selected to participate in the YRBS. Seventy-six percent of those schools selected agreed to participate. Of the students in the sample, 87% or 1,991 were in school the day the survey was given and returned usable questionnaires which could be analyzed.

SIGNIFICANCE

Data from the 1997 Youth Risk Behavior Survey suggests high rates of early sexual involvement for Arkansas children. Results included sixty percent of Arkansas high school students reported that they had sexual intercourse. Twelve percent reported that they had sexual intercourse for the first time prior to age 13. Twenty-five percent reported having sexual intercourse with four or more people during their young life.

SP # 22

PERFORMANCE MEASURE:

The percentage of children through age 18 and below 200 percent of poverty enrolled in ARKids First child health insurance program.

STATUS:

Active

GOAL

To increase the percentage of children enrolled in ARKids First child health insurance program.

DEFINITION

Numerator:

The number of children 0 through 18 and below 200 percent of poverty with ARKids First health insurance.

Denominator:

The total number of children below 200 percent of poverty under age19.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

ARKids First, ADH Management System and MCH Information Line statistics.

SIGNIFICANCE

SP # 24

PERFORMANCE MEASURE:

The percent of pregnant women counseled for HIV testing.

STATUS:

Active

GOAL

Increase the number of pregnant women counseled and ultimately screened for HIV.

DEFINITION

During FY 99 the baseline will be derived from the number of women who respond on the PRAMS survey that they were counseled by their prenatal provider about the need to test their blood for HIV (question 16.1). Baseline data concerning whether they were screened will also be established, using PRAMS (question 59).

Numerator:

Denominator:

Units: Text:

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

There is currently no statewide data available on HIV counseling or screening. Baseline data will be obtained in FY 1999, from PRAMS survey responses. These will have a confidence interval of ± 3 . Based on these figures, statewide data will be interpolated. After determining a statewide baseline, a realistic goal will be established.

SIGNIFICANCE

In calendar year 1997, Arkansas had 361 newly reported cases of HIV. 95 of these cases were women. Data is not available concerning how many of these women may have been pregnant. However, 22 babies were reported born to HIV/AIDS positive women in 1997.

PERFORMANCE MEASURE:

Percentage of children receiving WIC services who are above the 95th percentile on the National Center for Health Statistic weight for height growth charts.

STATUS:

Active

GOAL

To decrease the percentage of low-income children who are overweight.

DEFINITION

Overweight is defined as the weight for height above the 95th percentile in the National Center for Health Statistics reference population.

Numerator:

The number of children certified for WIC, age 0 to five, above the 95th percentile on the National Center for Health Statistic weight for height growth charts.

Denominator:

The total number of children certified for WIC.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Baseline data source: Pediatric Nutrition Surveillance System.

SIGNIFICANCE

Childhood overweight/obesity, a known precursor to adult obesity, increases the prevalence of obesity-related disorders such as diabetes and heart disease in the population. The causes of childhood overweight/obesity are multifactorial including parental ignorance concerning sound nutritional practices, media promotion of nutritionally harmful products, and decreased incentives and opportunities for physical activity. Given the definition of overweight/obesity in this objective, 5% of healthy children are expected to be above the 95th percentile of weight for height due to normal biological variation. A prevalence of more than 5% for any population subgroup suggests overweight/obesity is a concern of that subgroup.

SP # 28

PERFORMANCE MEASURE:

To improve the percent of 14 to 15 year olds on Children's Medical Services (CMS) who state that CMS transition services have helped improve their knowledge and ability to transition into adult life.

STATUS:

Active

GOAL

CMS hopes to improve transition services to youth with disabilities on CMS to help them successfully transition into adulthood.

DEFINITION

Numerator:

The number of youth ages 14 to 15 (or their parents) who state on the biennial client satisfaction Survey that CMS transition services have helped improve their knowledge and ability to transition into adult life.

Denominator:

The number of 14 to 15 year olds (or their parents) who respond to the biennial CMS client satisfaction survey.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The biennial CMS Client Satisfaction Survey is the source of data for this measure. The response rate of the target population to this survey may be a concern if it is not high enough to be statistically significant.

SIGNIFICANCE

This measure should help determine to what degree CMS transition efforts are successful in actually helping all youth on CMS to transition into adulthood.

SP # 29

PERFORMANCE MEASURE:

To improve the percent of parents responding to the question on the Children's Medical Services (CMS) Parent Satisfaction Survey that CMS service coordination teams told them about other services available to them.

STATUS:

Active

GOAL

CMS hopes to improve care coordination services to all families on CMS so that they will be able to access all needed services.

DEFINITION

Numerator:

The number of parents who stated on the CMS Parent Satisfaction Survey that CMS service coordination teams had told them about other services available to them.

Denominator:

The total number of parents responding to the CMS Parent Satisfaction Survey.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The biennial CMS Client Satisfaction Survey is the source of data for this measure. The response rate of the target population to this survey may be a concern if it is not high enough to be statistically significant.

SIGNIFICANCE

This measure should help to determine to what degree CMS care coordination services are effective in helping parents of CSHCN to obtain the services they need.

SP # 30

PERFORMANCE MEASURE:

The percent of public school students overweight greater than 95th percentile.

STATUS:

Active

GOAL

Reduce the percentage of overweight children in Arkansas public schools from 22 percent (annual indicator – baseline data 2004) to 15 percent (annual objective).

DEFINITION

The data come from 730 of Arkansas' 1,139 schools. Out of 316 school districts, 265 have data included in this report. These students are distributed across 67 of Arkansas 75 counties.

Numerator:

276,783

Denominator:

60,953

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

19-3

Overweight or obesity in children and adolescents

DATA SOURCES AND DATA ISSUES

Arkansas BMI Task force, a partnership including Local School Districts, Arkansas Center for Health Improvement, Arkansas Department of Education, Arkansas Department of Health, and UAMS College of Public Health. Baseline BMI Arkansas Public Schools 2004

SIGNIFICANCE

Over 60% of adult Arkansans are either overweight (BMI 25-29.9) or obese (BMI > 30). One in four Arkansas high school students is either overweight or at risk for being overweight. Overweight children are more likely to develop childhood diabetes, hypertension and lung problems. Overweight school age children are 50% more likely to become obese adults. Overweight adolescents are 70 - 80% more likely to become obese adults. Life expectancy for obese young adults is 5 - 20 years less than normal weight persons. Obese adults have significantly higher rates of diabetes, heart disease, cancer, stroke, hypertension and arthritis. In 2002, the United States spent an estimated 92.6 billion dollars on illnesses related to obesity.

SP # 31

PERFORMANCE MEASURE:

The percentage of at-risk for overweight children in Arkansas public schools.

STATUS:

Active

GOAL

Reduce the percentage of at-risk for overweight children in Arkansas public schools from 18 percent (annual indicator – baseline data 2004) to 11 percent (annual objective) by 2007.

DEFINITION

The data come from 730 of Arkansas' 1,139 schools. Out of 316 school districts, 265 have data included in this report. These students are distributed across 67 of Arkansas 75 counties.

Numerator:

276,783

Denominator:

49,016

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

19.3

Reduce the proportion of children and adolescents who are overweight or obese.

DATA SOURCES AND DATA ISSUES

Arkansas BMI Task Force, a partnership of Local School Districts, Arkansas Center for Health Improvement, Arkansas Department of Education, Arkansas Department of Health and UAMS College of Public Health.

SIGNIFICANCE

One in four Arkansas high school students is either overweight or at risk for being overweight. Overweight children are more likely to develop childhood diabetes, hypertension and lung problems. Overweight school age children are 50% more likely to become obese adults. Overweight adolescents are 70 - 80% more likely to become obese adults. Life expectancy for obese young adults is 5 - 20 years less than normal weight persons.

SP # 32

PERFORMANCE MEASURE:

The percent of women smoking during pregnancy.

STATUS:

Active

GOAL

Reduce the percent of Arkansas women smoking during the last three months of pregnancy as reported by Arkansas PRAMS.

DEFINITION

19.7% of Arkansas moms reported that they smoked during the last three months of pregnancy.

Numerator:

N= 6690 Live births in 2001, PRAMS mothers reporting.

Denominator:

D= 34,273 Total number of live births in 2001 statistically weighted. The denominator, represents all mothers experiencing a live birth in 2001. This number is calculated by the sampling program that weights the data set.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

27-6,16-10a, and 16-10b

27-6. Increase smoking cessation during pregnancy. Target: 30 percent. Baseline: 14 percent of females aged 18 to 49 years stopped smoking during the first trimester of their pregnancy in 1998. Target setting method: Better than the best. Data source: National Health Interview Survey (NHIS), CDC, NCHS. 16-10. Reduce low birth weight (a-LBW) and very low birth weight (b-VLBW). Target and baseline: a – LBW 5% b – VLBW .9%

DATA SOURCES AND DATA ISSUES

Arkansas Center for Health Statistics, PRAMS 2001

SIGNIFICANCE

Smoking during pregnancy can result in miscarriages, premature delivery, and sudden infant death syndrome. Preterm birth is associated with a number of modifiable risk factors, including the use of alcohol, tobacco, or other drugs during pregnancy. Smoking accounts for 20 to 30 percent of all LBW births in the United States.

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's SCHIP programs for infants (0 to 1), children, SCHIP and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL SCHIP
a) <i>Infants (0 to 1)</i>	2003	<u>100</u>
b) <i>Medicaid Children</i> (Age range <u> </u> 18 to <u> </u> 19) (Age range <u> </u> to <u> </u>) (Age range <u> </u> to <u> </u>)	2003	<u>100</u> <u> </u> <u> </u>
c) <i>Pregnant Women</i>	2003	<u>100</u>

FORM NOTES FOR FORM 18

Data sources are linked HDDS/birth files. The 2003 linked file is not complete.

Medicaid pays the medical costs for 51% of all babies born to Arkansas residents.
Percent population served by Medicaid

Population all ages 2,706,656 – 24%
Elderly – 390,664 – 16%
Adult (20-64) – 1,587,576 – 12%
Children (19 and under) – 728,416 – 53%

HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: AR

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	2	Yes
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: AR

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Other: Youth Risk Behavior Survey (YRBS)		

HEALTH SYSTEMS CAPACITY INDICATOR #09C (Data Capacity) Overweight/Obesity
(The Ability of the State to Determine the Percent of Children Who are Obese or Overweight)

Data Source	Does your state participate in this survey/data source? (Select 1 - 3)*	Does your MCH program have direct access to this electronic database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Pediatric Nutrition Surveillance System (PedNSS)	3	Yes
WIC Program Data	3	Yes
Other:		

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 20

None

FIELD LEVEL NOTES

1. **Section Number:** Health Status Indicator #01A

Field Name: HSI01A

Row Name:

Column Name:

Year: 2005

Field Note:

Data are for calendar years. Although the 2003 data are provisional, they will change very little when they become finalized. Low birthweight rates increased again in 2003. This increase occurred among births between 1500 and 2000 grams. The very low birthweight rates did not increase. The middle birthweight percent rose among whites, not African Americans. The middle birthweight rise occurred among singleton births, indicating that increasing proportions of multiple births due to infertility treatments does not explain the whole trend.

2. **Section Number:** Health Status Indicator #01B

Field Name: HSI01B

Row Name:

Column Name:

Year: 2005

Field Note:

Data are for fiscal years.

3. **Section Number:** Health Status Indicator #02A

Field Name: HSI02A

Row Name:

Column Name:

Year: 2005

Field Note:

Data are for fiscal years.

4. **Section Number:** Health Status Indicator #02B

Field Name: HSI02B

Row Name:

Column Name:

Year: 2005

Field Note:

Data are for fiscal years.

5. **Section Number:** Health Status Indicator #03A

Field Name: HSI03A

Row Name:

Column Name:

Year: 2005

Field Note:

Data are for calendar years.

Observed declines in injury rates are consistent with increases in programmatic efforts in Arkansas, and data from sources such as motor vehicle accidents.

6. **Section Number:** Health Status Indicator #05A

Field Name: HSI05A

Row Name:

Column Name:

Year: 2005

Field Note:

2002 and 2003 Chlamydia case rates per 1000 female population data are for females ages 15-24 years of age. Please note that population figures for the year 2002 were used to compute the rates for 2003 case rates.

The apparent increase in chlamydia case identification is of concern. With updating of the population estimates, the 26.6% figure may change. We will follow this development.

7. **Section Number:** Health Status Indicator #05B

Field Name: HSI05B

Row Name:

Column Name:

Year: 2005

Field Note:

2002 and 2003 Chlamydia case rates per 1000 female population data are for females ages 25-44 years of age. Please note that population figures for the year 2002 were used to compute the rates for 2003 case rates.
