FORM 2
MCH BUDGET DETAILS FOR FY 2005

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: RI

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 1,768,713

A. Preventive and primary care for children:

\$ 530,616 (30%)

B. Children with special health care needs:

\$ 618,636 (34.98%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C. Title V administrative costs:

\$ 129,898 (7.34%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 262,026

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 6,936,010

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 0

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 5,723,009

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 1,875,000

\$ 12,659,019

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 14,689,758

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 508,071

b. SSDI: \$ 121,611

c. CISS: \$ 0

d. Abstinence Education: \$ 208,881

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 19,517,000

h. AIDS: \$ 0

i. CDC: \$ 4,432,764

j. Education: \$ 3,848,705

k. Other:

HRSA \$ 957,166

TITLE X \$ 1,254,260

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 30,848,458

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 45,538,216

FORM NOTES FOR FORM 3

Our expenditures for FY03 increased from the amount budgeted to expended on Form #3 because of our unobligated balance from the prior year. The division spent an additional \$400,000 of Title V funds from FY02 to FY03 and over \$1million dollars in carryforward from FY03 budgeted to FY03 spent. Most of the expenditures for FY03 were wraparound services for children with special needs. The division relies on this prior year balance to fund new initiatives and unplanned expenditures. There were some changes in federal funds from FY02 spent to FY05 budget, most notably the Centers for Disease Control funding for the Childhood Lead grant, Meningitis funds but loss of funding for the Data and Evaluation and Birth Defects grants. Early Intervention resources increased from FY02 to FY03 spent to account for dollars budgeted for insurance payments. WIC funds increased from FY02 to FY03

FORM NOTES FOR FORM 4

The division budgeted funds for FY03 with the expectation that funds would be spent in the appropriate categories, i.e. pregnant women, infants, children and children with special needs. During FY03, funds for Early Intervention exceeded budgetary plans leaving less resources available for the other categories. Therefore, state funds for children with special needs increased from FY03 budgeted to FY03 spent but decreased for the same period for pregnant women, infants less than one, and children ages 1-22. Administrative costs were also less than anticipated in FY03.

More resources are budgeted for infants in FY05 than in FY03 because of increase resources for immunization and federal funds listed above for this population. The increase of resources for the special needs population not only is due to our new Office for Families Raising Children with Special Needs but more federal funds for this population from both CDC and the Department of Education. There are additional immunization funds budgeted in FY05 than in FY03 and a \$50,000 grant for child care services.

FORM NOTES FOR FORM 5

Changes in expenditures for direct health services from FY02 to FY03is due to a \$400,000 increase in Early Intervention Services. The largest change in expenditures is for direct services and population based services. The division has reduced the state funding for Early Intervention in anticipation of receiving revenues from private insurers.

Low Carnitine	13,763	99.6	1	1	1	100

Screening Programs for Older Children & Women (Specify Tests by name)

- (1) Use occurrent births as denominator.
 (2) Report only those from resident births.
 (3) Use number of confirmed cases as denominator.

FORM NOTES FOR FORM 6

2003:
PKU: No treatment was required for one of the variants.
Biotinidase: only 2 of the 3 cases required treatment .
Other: Carnitine Deficiency; genetic testing is pending.
Non-Sickling HGB:
1 case moved to MA before confirmatory testing
2 cases have appointments scheduled for confirmatory testing
2 cases did not keep scheduled appointments, follow up letters sent to MD.

Children 1 to 22 years old	49,617	38.4		48.3	8.1	5.1
Children with Special Healthcare Needs	7,264	51.9		42.5	4.5	1.1
Others	17,820	60.0		22.0	17.1	0.9
TOTAL	93,665					

FORM NOTES FOR FORM 7

Data are estimated and reflect calendar year 2003. Unduplicated count is not yet possible.

'Other' in column A, includes Family Planning Services provided to non pregnant women aged 23 and older as well as services provided to adults by Family Resources Counselors.

Title XXI is part of Rhode Island's extended Medicaid/Rlte Care Plan and serves children aged 8-18.

Title V program data do not capture Title XXI as a separate category, rather those who are covered by Title XXI are included in the Rlte Care data.

Eligible for Title XIX	2,505	1,700	495	127	11	491	1,015	56

FORM NOTES FOR FORM 8

2003: Since out-of-state birth data is not yet available, data reported in 'Total Infants in State', part I & II, reflect an estimate of resident births by race and ethnicity. Approximately 450-520 resident births occur out-of-state and insurance status has never been reported on these births. Therefore, 'TITLE V SERVED' and 'ELIGIBLE FOR XIX' , reflected only resident births born in Rhode Island

FIELD LEVEL NOTES

None

FORM NOTES FOR FORM 9

The rise in number of calls between 1999 and 2000 is largely due to media campaigns, outreach and provider education. From 2000 and on calendar year totals are reported.

2001: Received 4,602 calls of which 690 were from Spanish callers.

2002: Received 4,533 calls of which 564 were from Spanish callers.

2003: Received 3,425 calls of which 560 were from Spanish callers.

1,256 calls dealt with immunization and 1,010 calls dealt with WIC information/Eligibility.

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2005
[SEC. 506(A)(1)]
STATE: RI

1. State MCH Administration:
(max 2500 characters)

The Division of Family Health is responsible for needs assessment, policy development, and programs to protect and promote the health of children and their families in Rhode Island. In addition to its partnership and leadership roles, the Division manages newborn screening, home visiting, WIC, immunization, lead poisoning, Early Intervention (IDEA Part C), school health centers, abstinence education, poison control, family planning (Title X), Women's Health Screening, and other major programs.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ <u>1,768,713</u>
3. Unobligated balance (Line 2, Form 2)	\$ <u>262,026</u>
4. State Funds (Line 3, Form 2)	\$ <u>6,936,010</u>
5. Local MCH Funds (Line 4, Form 2)	\$ <u>0</u>
6. Other Funds (Line 5, Form 2)	\$ <u>0</u>
7. Program Income (Line 6, Form 2)	\$ <u>5,723,009</u>
8. Total Federal-State Partnership (Line 8, Form 2)	\$ <u>14,689,758</u>

9. Most significant providers receiving MCH funds:

<u>Early Intervention Providers</u>
<u>School Based Health Centers</u>
<u>Community Health Centers</u>
<u>Visiting Nurses Agencies</u>

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	<u>5,141</u>
b. Infants < 1 year old	<u>13,823</u>
c. Children 1 to 22 years old	<u>49,617</u>
d. CSHCN	<u>7,264</u>
e. Others	<u>17,820</u>

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:

(max 2500 characters)

1. SCHOOL BASED HEALTH CENTERS - Supports seven school based health centers and their professional/community partners to offer comprehensive preventive care to urban adolescents. Provides professional/public education on teen health and mental health needs. 2. WOMEN'S HEALTH SCREENING AND REFERRAL PROGRAM - Provides comprehensive women's health screening in primary care settings. Prevents unintended pregnancies and provides pregnancy outcomes by identifying health risks and ensuring appropriate referrals, both prenatally and during the pre-conception period. 3. HOME VISITING PROGRAM - Provides developmental screening, home assessments, connection to community services, and help with child development for about one third of all families with new babies each year. Also provides nurses, social workers, and trained parent visitors for expectant mothers, and serves as the neighborhood followup staff for newborn screening, Early Intervention, Lead Poisoning, and Immunization programs. (Also known as the Family Outreach Program). See End Notes for additional direct medical care and enabling services description.

b. Population-Based Services:

(max 2500 characters)

1. KIDSNET - Provides an integrated management information system for newborn screening, lead screening, immunization, WIC, Early Intervention, home visiting, and other preventive programs. Provides comprehensive followup as needed through home visiting. Connects to doctors offices, visiting nurses, and other professionals to assure every child is served. Also manages expensive vaccines and measures system performance. 2. COMMUNICATIONS AND POLICY UNIT - Develops and supports public engagement/marketing with programs. Provides consultation and support on communications and policy issues. 3. NEWBORN SCREENING - Provides universal screening and followup for a growing list of metabolic, endocrine, and blood disorders, and other serious diseases of infancy. Also provides clinical services and special diets. Includes our genetics program, hearing and risk assessment for all newborns. See End Notes for additional population-based services description.

c. Infrastructure Building Services:

(max 2500 characters)

1. PARENT CONSULTANT PROGRAM - Recruits, trains, and supports parents as partners for outreach, policy development, and quality improvement, in state and local level assignments. Provides public education and a voice for family-centered, culturally competent programs. 2. COMMUNITY FAMILY HEALTH PARTNERSHIPS - Develops and supports community self assessments and system improvement plans for Division of Family Health programs. Supports and coordinates integrated community investments (Child Opportunity Zones, Parents as Partners, Family Resource Counselors). 3. DATA AND EVALUATION - Develops, supports, and analyzes data for needs assessment, policy and program management, quality assurance, and local/state/national partners. 4. HEALTHY CHILD CARE - Develops and supports policies and programs to promote health and safety of children in child care. Child Care Support Network assesses and trains child care providers.

12. The primary Title V Program contact person:

Name William H. Hollinshead, MD, MPH
 Title Medical Director
 Address Rhode Island Department of Health/Family Health3 Car

13. The children with special health care needs (CSHCN) contact person:

Name Deb Garneau
 Title Chief, Office for Children with Special Health Care Neer
 Address Rhode Island Department of Health/Family Health3 Car

FORM NOTES FOR FORM 11

Unless otherwise indicated, 2003 data are for calendar year and are provisional. Approximately 450 - 520 births occur out-of-state for Rhode Island residents and these births are not yet available.

When possible, data for previous years are updated.

In most cases 2000 US Census are numbers used.

FIELD LEVEL NOTES

1. **Section Number:** Performance Measure #1
Field Name: PM01
Row Name:
Column Name:
Year: 2005
Field Note:
2003: No treatment was needed for one fo the PKU cases.
2. **Section Number:** Performance Measure #2
Field Name: PM02
Row Name:
Column Name:
Year: 2005
Field Note:
2003: SLAITS-Rhode Island data for 2002 are provided. SLAITS Survey is conducted every 5 years.
3. **Section Number:** Performance Measure #3
Field Name: PM03
Row Name:
Column Name:
Year: 2005
Field Note:
2003: SLAITS-Rhode Island data for 2002 are provided. SLAITS Survey is conducted every 5 years.
4. **Section Number:** Performance Measure #4
Field Name: PM04
Row Name:
Column Name:
Year: 2005
Field Note:
2003: SLAITS-Rhode Island data for 2002 are provided. SLAITS Survey is conducted every 5 years.
5. **Section Number:** Performance Measure #5
Field Name: PM05
Row Name:
Column Name:
Year: 2005
Field Note:
2003: SLAITS-Rhode Island data for 2002 are provided. SLAITS Survey is conducted every 5 years.
6. **Section Number:** Performance Measure #6
Field Name: PM06
Row Name:
Column Name:
Year: 2005
Field Note:
2003: SLAITS-Rhode Island data for 2002 are provided. SLAITS Survey is conducted every 5 years.
7. **Section Number:** Performance Measure #7
Field Name: PM07
Row Name:
Column Name:
Year: 2005
Field Note:
2003: Starting with 2000, data for this performance measure reflects the 4:3:1:3:3 series collected through the National Immunization Survey. The data for 2003 are provisional and will be updated when data are final.
8. **Section Number:** Performance Measure #8
Field Name: PM08
Row Name:
Column Name:
Year: 2005
Field Note:
Population used for 2003 is from the 2000 US Census.
9. **Section Number:** Performance Measure #9
Field Name: PM09
Row Name:
Column Name:
Year: 2005
Field Note:
2003: Data are estimated. Data are provided by the Providence Smiles Program which is an elementary school oral health program operating in ten schools in the city of Providence. In 2003 two elementary schools in Pawtucket were added. The program offers in-classroom oral health education, screenings, oral prophylaxis, fluorial treatments and sealant application. In addition, the program offers referral services for those children in need of more extensive care.
10. **Section Number:** Performance Measure #10
Field Name: PM10
Row Name:
Column Name:
Year: 2005
Field Note:
2003: Data are provisional and reflect calendar year. Updates are made to previous years when data are available.
11. **Section Number:** Performance Measure #11
Field Name: PM11

Row Name:
Column Name:
Year: 2005

Field Note:
Data reflect calendar year and for "breastfeeding only". Does not include if breastfeeding and bottle feeding were combined.

Since breastfeeding is captured through the Newborn Developmental Risk Assessment Screening Program, data reflect Rhode Island resident births born in Rhode Island.

12. Section Number: Performance Measure #13

Field Name: PM13

Row Name:
Column Name:
Year: 2005

Field Note:
Data is from US Census Bureau March Current Population Survey [CPS]. Data for 2003 are not yet available and therefore, are estimated.

13. Section Number: Performance Measure #14

Field Name: PM14

Row Name:
Column Name:
Year: 2005

Field Note:
From FY99, NPM #14 reflects children aged <19; data were provided by the Department of Human Services and the US census.

14. Section Number: Performance Measure #16

Field Name: PM16

Row Name:
Column Name:
Year: 2005

Field Note:
Data are provisional and reflect calendar year.
Due to small numbers, this performance measure fluctuates from year-to-year. The number of suicide deaths among teens has ranged from 3-6 per year.

15. Section Number: Performance Measure #17

Field Name: PM17

Row Name:
Column Name:
Year: 2005

Field Note:
Data reflect VLBW babies born in Rhode Island hospitals to Rhode Island residents. Hospital of birth is not entered for RI resident births occurring out-of-state.

16. Section Number: Performance Measure #18

Field Name: PM18

Row Name:
Column Name:
Year: 2005

Field Note:
Data reflects Rhode Island resident births occurring in Rhode Island. Birth records with unknown or missing 'month of prenatal care ' are excluded from the denominator.

17. Section Number: State Performance Measure #1

Field Name: SM1

Row Name:
Column Name:
Year: 2005

Field Note:
2003: Data source is the Annual School/Licensed Daycare Immunization Survey. Data presented is for licensed daycares only.

18. Section Number: State Performance Measure #2

Field Name: SM2

Row Name:
Column Name:
Year: 2005

Field Note:
2003: There were programming errors in the numerator. Data for FY2003 reflects a correction to the program. Previous years data should be considered estimates. Annual Performance Objectives have been adjusted to reflect the programming correction.

19. Section Number: State Performance Measure #3

Field Name: SM3

Row Name:
Column Name:
Year: 2005

Field Note:
2003: ACOG recommends multiple marker screenings in pregnancy be done. As a result of the ACOG recommendation, marker screenings are uniformly offered and covered by health insurance plans. AFP screening tests, along with other marker screenings, are recommended for women with gestational ages between 15 weeks through 22 weeks and 6 days.

The numerator is the number of pregnant women who received AFP tests at the regional perinatal center's (Women and Infants Hospital) Prenatal Diagnostic Center. It does not include pregnant women who may have received tests elsewhere. Currently, 68% of all births occur at the regional perinatal center. The denominator reflect resident data which is provisional and maybe updated.

20. Section Number: State Performance Measure #4

Field Name: SM4

Row Name:
Column Name:
Year: 2005

Field Note:
Out-of-state resident births for 2003 are not available.
"Population subgroups" are defined as: African American, Asian, Native American, Hispanic women and/or those residing in the five core cities. Data for all population subgroups is generated, analyzed and reported on. Due to space only data on African American women is reported in this State Performance Measure.

Data for this performance measure reflect the proportion of African American women only who received prenatal care in the first trimester. Data excludes those pregnant African American women for whom month prenatal care began was unknown.

21. Section Number: State Performance Measure #5

Field Name: SM5

Row Name:
Column Name:
Year: 2005

Field Note:

2003: From 1998 and on, this State Performance Measure reflects lead levels greater than or equal to 10ug/dl among children residing in Rhode Island's core cities. Prior to 1998, data reflects lead levels greater than or equal to 10ug/dl among non-white children state wide.

22. Section Number: State Performance Measure #6

Field Name: SM6

Row Name:

Column Name:

Year: 2005

Field Note:

High School Graduation Rate: percentage of ninth grade class expected to graduate, based on the existing drop-out incidence of 9th, 10th, 11th and 12th grade students. Data reflect school year and are for public schools.

23. Section Number: State Performance Measure #7

Field Name: SM7

Row Name:

Column Name:

Year: 2005

Field Note:

2003: Calendar year used. In 2001, a Transition Co-ordinator was hired to work with the EI Sites and the Department of Education to facilitate the transition process. This has produce more reliable data and the timely development of Individual Education Plans [IEPs].

24. Section Number: State Performance Measure #8

Field Name: SM8

Row Name:

Column Name:

Year: 2005

Field Note:

During FY99, the WIC Program instituted national risk criteria with standardized definitions of specific risks resulting in: the risk definition of overweight dropped from >=95th percentile to >=90th percentile; and the risk definition for underweight infants dropped from <=25th percentile to <=10th percentile. FY99 data reflect these changes and show an increase in the proportion of children and infants enrolled in WIC who are either overweight or underweight.

2001: The increase seen in 2001 is largely due to changes in WIC programming; now all eight risk criteria are included whereas, in previous years, only the first listed was captured by the system.

2002: The WIC program now defines overweight as Body Mass Index [BMI] >= 95th percentile or weight for height >= 95th percentile for children 2 years or older using stature height. WIC now includes an additional risk factor for determining overweight and infants are no longer included in the over weight category.

2003: Data for 2003 continues to be a reflection of the increase in Body Mass Index [BMI] from 90 % to 95%.
WIC data should be considered an estimate.

25. Section Number: State Performance Measure #10

Field Name: SM10

Row Name:

Column Name:

Year: 2005

Field Note:

Data reflect calendar year totals.

This performance measure was developed to capture the final number of surveys completed versus a response rate. Therefore, this measure is not a proportion or percentage, rather it is a number. Since the goal of this performance measure, as described in Form 16--Detail Sheet, is to increase family input, the increase in the number of completed surveys is the desirable outcome (not number of total attempts).

2003: Family surveys were conducted by many of the programs in Family Health, including WIC, Lead, Early Intervention, SSI and the Communications Unit. The selection criteria for clients surveyed varied depending on the purpose of the survey. The survey methods used included written and telephone surveys, intercept interviews and focus groups. Survey topics ranged from program development, testing program materials, barriers to services and satisfaction with services received. Starting with 2002, data also includes the number of completed PRAMS surveys received in that calendar year.

FORM 12
TRACKING HEALTH OUTCOME MEASURES
[SECS 505 (A)(2)(B)(iii) AND 506 (A)(2)(A)(iii)]
STATE: RI

OUTCOME MEASURE # 01

The infant mortality rate per 1,000 live births.

Please fill in only the Objectives for the above years. Numerator, Denominator and Annual Indicators are not required for future year data.

FORM NOTES FOR FORM 12

All outcome measures reflect Rhode Island resident data . Data for 2002 should be considered provisional and data for 2003 are estimated. Updates are made to previous years when data are available. Rhode Island Resident data are not final until 18 months after calendar year ends.

FIELD LEVEL NOTES

1. **Section Number:** Outcome Measure 2

Field Name: OM02

Row Name:

Column Name:

Year: 2005

Field Note:

Mother's race is used for infant mortality rates by race. Infant's race listed on the death file is used when mother's race is unknown.

FORM 13
CHARACTERISTICS DOCUMENTING FAMILY PARTICIPATION IN CSHCN PROGRAMS
STATE: RI

1. Family members participate on advisory committee or task forces and are offering training, mentoring, and reimbursement, when appropriate.

2

2. Financial support (financial grants, technical assistance, travel, and child care) is offered for parent activities or parent groups.

2

3. Family members are involved in the Children with Special Health Care Needs elements of the MCH Block Grant Application process.

2

4. Family members are involved in service training of CSHCN staff and providers.

2

5. Family members hired as paid staff or consultants to the State CSHCN program (a family member is hired for his or her expertise as a family member).

3

6. Family members of diverse cultures are involved in all of the above activities.

2

Total Score: 13

Rating Key

0 = Not Met

1 = Partially Met

2 = Mostly Met

3 = Completely Met

FORM NOTES FOR FORM 13

Form 13 was completed by [8] parent consultants employed by the Rhode Island Parent Information Network [RIPIN]. The score for each question reflects the average of all 8 forms completed. It should be noted that one of RIPIN's purposes is to provide support and referral to families with children with special health care needs. The length of employment of the parent consultants ranged from 2 months to 8 years with RIPIN. Two [2] of the parents are working with the Office of Children with Special Health Care Needs Program. The short length of employment of these parent consultants should be considered when evaluating the scores on Form 13.

FIELD LEVEL NOTES

None

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: RI FY: 2005

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women," and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Assure the health, safety and optimal development of children in child care
2. Improve the health, safety and optimal development of adolescents
3. Expand access to genetic services during the preconception and prenatal periods
4. Reduce and manage pregnancy risks
5. Provide education, support and environmental risk reduction to families
6. Strengthen partnerships between school, neighborhood and home
7. Assure access to appropriate services during periods of transitions for CSHCN and other children
8. Improve the nutritional status of children, youth and their families
9. Assure that eligible individuals participate in MCH programs through intensive outreach efforts
10. Increase community/family feedback and involvement regarding program services and policies

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: RI

SP # 1

PERFORMANCE MEASURE: Percent of children in child care, aged 19 months or older, who are up-to-date on their immunizations

STATUS: Active

GOAL All children in child care aged 19 months or older will be up to date on their immunizations

DEFINITION Up-to-date on their immunizations include 4+DTP, 3+Polio, 1+MMR, 3+Hib, 3+HepB, 1+Var.

Numerator:
The number of children in licensed child care, aged 19 months or older who are up to date on immunizations

Denominator:
The number of children in licensed child care aged 19 months or older

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES State Immunization Program and Federal

SIGNIFICANCE In Rhode Island in 1995, 63% of mothers with children under age 6 were in the labor force. More than 45,000 Rhode Island infants and preschool children are in need of some form of child care because their mother is in the labor force. Recent changes in welfare laws linking cash assistance to work or participation in work readiness programs will mean additional children in need of quality child care. Immunization rates in child care settings will be used as a sentinel event indicating overall quality of child care. Quality child care can promote the health, safety and optimal development of children.

SP # 2

PERFORMANCE MEASURE:

Percent of students in schools with health centers who are enrolled in school-based health centers

STATUS:

Active

GOAL

To increase the number of school-aged children who receive comprehensive routine preventive health care.

DEFINITION

Numerator:

Number of students who are enrolled in school-based health centers

Denominator:

Number of enrolled students in schools with health centers

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Robert Wood Johnson On-Line School-Based Health Center Data System and RI Department of Education School Enrollment data

SIGNIFICANCE

Preventive services utilization by children drops off significantly at school entry. Development of school-based health centers is an effective strategy for assuring that school-aged children get routine preventive care. Rhode Island currently has school-based health centers in four communities. Partnerships between schools, local health care providers and families living in the community are key to the success of this initiative. Our efforts focus on building the infrastructure and reaching out and enrolling all children in sites with school-based health centers. Our long term goal is to have school-based health services available for all children in K-12 in all five core cities.

SP # 3

PERFORMANCE MEASURE:

The proportion of pregnant women who receive an alpha-fetoprotein (AFP) test

STATUS:

Active

GOAL

Increase access to prenatal diagnostic services and reduce poor birth outcomes.

DEFINITION

Numerator:

The number of pregnant women who receive an alpha-fetoprotein test.

Denominator:

The number of pregnant women in the state.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Women and Infants Hospital's Prenatal Diagnostic Center (PDC). Issues: The PDC provides alpha-fetoprotein (AFP) testing to approximately half of Rhode Island's pregnant women. The denominator used in the calculation is the number of total pregnancies among all Rhode Island women.

SIGNIFICANCE

One-fourth of all congenital anomalies are caused by genetic factors, suggesting a need for preconception genetic counseling and testing for men and women.

SP # 4

PERFORMANCE MEASURE:

Percent of pregnant women in at-risk population subgroups who received prenatal care beginning in the first trimester. (Data presented are for African Americans only)

STATUS:

Active

GOAL

To assure early entry into prenatal care to enhance pregnancy outcomes

DEFINITION

Numerator:

The number of live births by at-risk population subgroup with reported first prenatal visit during the first trimester (before 13 weeks gestation)

Denominator:

The number of live births by race/ethnicity and SES

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Vital Records and Universal Newborn Screening (Level I) data

SIGNIFICANCE

Numerous studies have demonstrated that early and comprehensive prenatal care reduces rates of infant death and low birth weight. An expectant mother with no prenatal care is three times as likely to have a low birth weight baby. The effect of early prenatal care is especially evident in studies of high risk groups such as, minority and low socioeconomic populations.

SP # 5

PERFORMANCE MEASURE:

Percent of children less than 6 years of age in at-risk population subgroups with lead levels greater than or equal to 10ug/dL (data presented will reflect lead levels in Core Cities)

STATUS:

Active

GOAL

To reduce lead poisoning among children aged less than 6 years of age with a special emphasis on minority and low income populations Percent of children residing in the core cities, aged less than 6 with lead levels greater than or equal to 10ug/dL. [at-risk population subgroup]

DEFINITION

The core cities in Rhode Island are Central Falls, Newport, Pawtucket, Providence and Woonsocket.

Numerator:

Number of children residing in the core cities, aged 9 months through five years, tested for lead poisoning with lead levels greater than or equal to 10ug/dL. [at-risk population subgroup]

Denominator:

Number of children aged 9 months through five years tested for lead poisoning and who reside in the core cities

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

8-11. Elevated blood lead levels in children.
Eliminate elevated blood lead levels in children.

DATA SOURCES AND DATA ISSUES

Lead Poisoning Prevention Program data system (STELLAR) and Kids Net system

SIGNIFICANCE

Lead poisoning is one of the nation's most prevalent childhood threats. Severe lead poisoning can lead to profound mental retardation, coma, seizures and death. Even low levels of exposure can impair central nervous system function, causing delayed cognitive development, hearing problems, growth retardation, and metabolic disorders. Homes and play areas, particularly in substandard housing areas remain a significant source of lead in children's blood. The chief sources of lead exposure are thought to be old flaking lead-based paint, dust and soil. Lead poisoning is more prevalent among children living in poverty, often in inner cities, than among those in higher socioeconomic levels. In Rhode Island, lead poisoning rates are highest among minority populations who reside in the core cities.

SP # 6

PERFORMANCE MEASURE:

The percent of 9th graders who are expected to graduate from high school.

STATUS:

Active

GOAL

To improve the health, safety and optimal development of children, including adolescents

DEFINITION

Numerator:

The number of students in grades 9-12 who dropped out of school in the previous school year

Denominator:

The number of students in grades 9-12 enrolled in current school year

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

RI Department of Elementary and Secondary Education

SIGNIFICANCE

Children who receive a quality education are more likely to grow into capable, self-sufficient adults who contribute to their communities. Early warning signs for a student likely to drop out of school include ability to read at grade level, poor grades, frequent truancy, behavior problems, substance abuse and teen pregnancy. Students can benefit from access to a broad range of community supports that address academic issues, language barriers, health problems, inadequate nutrition, neighborhood and family violence and other factors than can disrupt school performance. School completion can increase children's ability to escape poverty, form strong families, and raise successful children of their own.

SP # 7

PERFORMANCE MEASURE:

Percent of children in the Early Intervention Program with Individual Family Service Plans (IFSPs), discharged to Special Education, for whom an Individual Education Plan (IEP) is developed.

STATUS:

Active

GOAL

To ensure that CSHCN who participate in the Early Intervention Program receive appropriate services as they transition into the educational system

DEFINITION

Numerator:

Number of children in the Early Intervention Program , discharged to Special Education, with IEPs developed

Denominator:

Number of children that were enrolled in the Early Intervention Program and discharged to Special Education.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Early Intervention Program and RI Department of Education

SIGNIFICANCE

Improving the health of children requires a wide range of interventions including health, education, social and family support. Intervening early with disadvantaged children and children with special health care needs significantly improves outcomes. Continued improvement in the health, safety and optimal development of children with special health care needs are dependent on smooth, well organized transitions. The critical transition points for children with special health care needs include early childhood to school entry and school to work.

PERFORMANCE MEASURE:

[REVISED:]The percentage of children age 2 years and above in the WIC Program who are overweight (high weight for stature) and infants and children who are underweight (low weight for stature).

STATUS:

Active

GOAL

To improve the nutritional status of children.

DEFINITION

FY99-FY01: Percent of infants with lengths for weight that are either less than or equal to the 10th percentile or greater than or equal to the 90th percentile; and the percent of children with statures for weight that are either less than or equal to the 10th percentile or greater than or equal to the 90th percentile. As of FY02, the WIC Program's definition of overweight changed to the following: the percentage of children aged two or greater who had a BMI or weight/height greater than or equal to the 95th percentile. The WIC Program defines infants and children aged less than six as "underweight" if their weight for height is less than or equal to the 10th percentile.

Numerator:

Infants with lengths for weight that are either less than or equal to the 10th percentile or greater than or equal to the 90th percentile; Children with statures for weight that are either less than or equal to the 10th percentile or greater than or equal to the 90th percentile. [REVISED:]Overweight Numerator: Number of children aged 2 or greater who had a BMI or weight/height greater than or equal to the 95th percentile. Underweight Numerator: Number of infants and children aged less than six who had weights for height that were less than or equal to the 10th percentile.

Denominator:

Total number of Infants enrolled in the WIC Program; Total number of children aged 1-5 enrolled in the WIC Program [REVISED:]Overweight Denominator: Number of children aged 2 or greater enrolled in the WIC Program. Underweight Denominator: Number of infants and children aged less than six enrolled in the WIC Program.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Rhode Island WIC data system

SIGNIFICANCE

Undernutrition during any period of childhood can have a detrimental impact on a child's cognitive development. The longer a child's nutritional needs go unmet, the greater the risk of cognitive impairment. Low income children are more likely than other children to be at risk for undernutrition. Lifetime diet and exercise patterns are established early in childhood. Fat makes up more than 36% of calories in the average American diet, a figure that is too high according to most experts. It is recommended that children over two reduce that figure to no more than 30%.

SP # 9

PERFORMANCE MEASURE:

Percentage of at risk (risk positive) newborns who receive a home visit from the Family Outreach Program during the early newborn period (<= 90 days old).

STATUS:

Active

GOAL

To reduce risks among newborns and their families

DEFINITION

Numerator:

Number of at risk newborns who receive a home visit from the Family Outreach Program

Denominator:

Number of at risk newborns

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Universal Newborn Developmental Risk Screening (Level I), Home Visiting Risk Response, and Kids Net data systems.

SIGNIFICANCE

Access to a broad range of health and family support services is critical to helping children grow into strong, healthy, productive adults and good parents. Children are at an increased risk if their parents or caregivers are overwhelmed by multiple problems such as inadequate income, lack of a job or a decent place to live, emotional stress, isolation from extended family or friends, drug and/or alcohol abuse, mental illness, or domestic violence. Many parents lack essential parenting skills and are struggling with a combination of social and economic issues. Families benefit from access to comprehensive services that are able to flexibly respond to their needs.

SP # 10

PERFORMANCE MEASURE:

Number of family surveys completed

STATUS:

Active

GOAL

To increase family input as measured by the number of family surveys completed.

DEFINITION

An analysis and report of the family surveys

Numerator:

Denominator:

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Family Health surveys

SIGNIFICANCE

The last decade has emphasized the central role of families as advisors and participants in policy making activities. To be effective, the maternal and child health service system should be driven by the needs and priorities as described by the families served.

FORM 17
HEALTH SYSTEMS CAPACITY INDICATORS
FORMS FOR HSCI 01 THROUGH 04, 07 & 08 - MULTI-YEAR DATA
STATE: RI

HEALTH SYSTEMS CAPACITY MEASURE # 01

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	<u>Annual Indicator Data</u>				
	1999	2000	2001	2002	2003
Annual Indicator	66.5	60.3	65.3	74.2	90.3
Numerator	425	385	417	474	577
Denominator	63,896	63,896	63,896	63,896	63,896
Is the Data Provisional or Final?				Final	Provisional

HEALTH SYSTEMS CAPACITY MEASURE # 02

The percent Medicaid enrollees whose ages less than one year during the reporting year who received at least one initial periodic screen.

	<u>Annual Indicator Data</u>				
	1999	2000	2001	2002	2003
Annual Indicator	94.7	91.7	92.6	88.4	91.4
Numerator	6,560	7,211	7,643	8,397	10,652
Denominator	6,928	7,861	8,258	9,495	11,650
Is the Data Provisional or Final?				Final	Final

HEALTH SYSTEMS CAPACITY MEASURE # 03

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

	<u>Annual Indicator Data</u>				
	1999	2000	2001	2002	2003
Annual Indicator	NaN	NaN	NaN	NaN	NaN
Numerator	0	0	0	0	0
Denominator	0	0	0	0	0
Is the Data Provisional or Final?				Final	Final

HEALTH SYSTEMS CAPACITY MEASURE # 04

The percent of women (15 through 44) with a live birth during the reporting year whose observed to expected prenatal visits are greater than or equal to 80 percent on the Kotelchuck Index.

	<u>Annual Indicator Data</u>				
	1999	2000	2001	2002	2003
Annual Indicator	86.5	87.2	87.3	86.8	88.1

FIELD LEVEL NOTES

1. **Section Number:** Health Systems Capacity Indicator #01
Field Name: HSC01
Row Name:
Column Name:
Year: 2005
Field Note:
Data are provisional and reflect fiscal year.
2. **Section Number:** Health Systems Capacity Indicator #02
Field Name: HSC02
Row Name:
Column Name:
Year: 2005
Field Note:
2003: The numbers reflect the increase in births and increase in enrollment.
3. **Section Number:** Health Systems Capacity Indicator #03
Field Name: HSC03
Row Name:
Column Name:
Year: 2005
Field Note:
In Rhode Island, children in SCHIP are aged 8-18. Infants and children less than 8 years old are enrolled in our Medicaid Managed Program [RiteCare].
4. **Section Number:** Health Systems Capacity Indicator #04
Field Name: HSC04
Row Name:
Column Name:
Year: 2005
Field Note:
2003 data are provisional and reflect calendar year. The Kotelchuck Index was applied to women aged 15 to 44 with no medical risks. Data for previous years is updated when out of state births are added to resident birth file.
5. **Section Number:** Health Systems Capacity Indicator #08
Field Name: HSC08
Row Name:
Column Name:
Year: 2005
Field Note:
2003: Data are estimated.
Rhode Island is a 1914A state and all children on SSI are enrolled in Medicaid. Medicaid benefits are extensive and include rehabilitative services. However, due to Medicaid's low reimbursement rate for rehabilitative services, the CSHCN program supplements the reimbursement rate to increase capacity for the EI providers. Payment is also provided for those SSI children receiving rehabilitative services at the Rhode Island Child Development Center.

The CSHCN Program is transitioning away from providing direct services. It is the goal of CSHCN Program to build resources in the community and sustain the provision of services for children with complex medical needs to other systems of care. It is the State's intention for the objective in this performance measure to decrease.

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #05
(MEDICAID AND NON-MEDICAID COMPARISON)
STATE: RI

INDICATOR #05 <i>Comparison of health system capacity indicators for Medicaid, non-Medicaid, and all MCH populations in the State</i>	YEAR	DATA SOURCE	POPULATION		
			MEDICAID	NON-MEDICAID	ALL
a) <i>Percent of low birth weight (< 2,500 grams)</i>	2003	Payment source from birth certificate	<u>9.4</u>	<u>8.1</u>	<u>8.7</u>
b) <i>Infant deaths per 1,000 live births</i>	2003	Payment source from birth certificate	<u>5.1</u>	<u>8.4</u>	<u>6.4</u>
c) <i>Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester</i>	2003	Payment source from birth certificate	<u>83.7</u>	<u>95</u>	<u>90.8</u>
d) <i>Percent of pregnant women with adequate prenatal care (observed to expected prenatal visits is greater than or equal to 80% [Kotelchuck Index])</i>	2003	Payment source from birth certificate	<u>82</u>	<u>91.5</u>	<u>88.1</u>

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #06(MEDICAID ELIGIBILITY LEVEL)
STATE: RI

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's Medicaid programs for infants (0 to 1), children, Medicaid and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL MEDICAID (Valid range: 100-300 percent)
a) <i>Infants (0 to 1)</i>	2003	<u>250</u>
b) <i>Medicaid Children</i> (Age range <u>1</u> to <u>18</u>) (Age range _____ to _____) (Age range _____ to _____)	2003	<u>250</u> _____ _____
c) <i>Pregnant Women</i>	2003	<u>185</u>

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #06(SCHIP ELIGIBILITY LEVEL)
STATE: RI

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's SCHIP programs for infants (0 to 1), children, SCHIP and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL SCHIP
a) <i>Infants (0 to 1)</i>		<u> </u>
b) <i>Medicaid Children</i> (Age range <u>8</u> to <u>18</u>) (Age range _____ to _____) (Age range _____ to _____)	2003	<u>250</u> _____ _____
c) <i>Pregnant Women</i>	2003	<u>250</u>

FORM NOTES FOR FORM 18

2003 data are provisional and reflect only Rhode Island resident births occurring in Rhode Island. Month prenatal care began is provided on out-of-state births but insurance status is not.

FIELD LEVEL NOTES

1. **Section Number:** Indicator 06 - Medicaid
Field Name: Med_Infant
Row Name: Infants
Column Name:
Year: 2005
Field Note:
Infants qualify if <250% of poverty level. SCHIP does not include infants.
2. **Section Number:** Indicator 06 - Medicaid
Field Name: Med_Children
Row Name: Medicaid Children
Column Name:
Year: 2005
Field Note:
Children aged 1 - 18 qualify if <250% of poverty level.
3. **Section Number:** Indicator 06 - Medicaid
Field Name: Med_Women
Row Name: Pregnant Women
Column Name:
Year: 2005
Field Note:
Pregnant/postpartum women qualify if <185% of poverty level. Families with incomes >150% of poverty level are subject to a family partial premium. Threshold increases to 185% for families consisting only of pregnant women and infants.
4. **Section Number:** Indicator 06 - SCHIP
Field Name: SCHIP_Infant
Row Name: Infants
Column Name:
Year: 2005
Field Note:
Rhode Island SCHIP does not include infants.
5. **Section Number:** Indicator 06 - SCHIP
Field Name: SCHIP_Children
Row Name: SCHIP Children
Column Name:
Year: 2005
Field Note:
Children aged 8 to 18 qualify for SCHIP if <250% of poverty level.
6. **Section Number:** Indicator 06 - SCHIP
Field Name: SCHIP_Women
Row Name: Pregnant Women
Column Name:
Year: 2005
Field Note:
Preganant or postpartum women qualify for SCHIP if between 185 %- 250% of poverty level.
7. **Section Number:** Indicator 05
Field Name: LowBirthWeight
Row Name: Percent of ow birth weight (<2,500 grams)
Column Name:
Year: 2005
Field Note:
2003 data are provisional and reflect only Rhode Island resident births occurring in Rhode Island.
8. **Section Number:** Indicator 05
Field Name: InfantDeath
Row Name: Infant deaths per 1,000 live births
Column Name:
Year: 2005
Field Note:
2003 Infant deaths: The provisional total of all resident infant deaths regardless of where they occurred is 84. However, insurance at birth was not listed for 2 of these infants. The 'Medicaid' and 'Non-Medicaid' columns report total resident infant death over resident births born in Rhode Island. The 'All' column reports total infant deaths [84] over the estitmate number of Rhode Island resident births. In this way, Form 18 (b) and Outcome #1 match.
The estimated resident birth number includes 479 estimated births that occurred out of state. Insurance status is not reported on the out of state births.
9. **Section Number:** Indicator 05
Field Name: CareFirstTrimester
Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester
Column Name:
Year: 2005
Field Note:
2003 data are provisional and reflect only Rhode Island resident births occurring in Rhode Island.
10. **Section Number:** Indicator 05
Field Name: AdequateCare
Row Name: Percent of pregnant women with adequate prenatal care
Column Name:
Year: 2005
Field Note:
2003 data are provisional and reflect resident births occurring in Rhode Island. Kotelchuck Index: Includes women without any pregnancy risks and women aged 15-44. Women with pregnancy related problems would receive more prenatal visits and therefore, have been excluded

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: RI

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	1	No
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: RI

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other: School Accountability for Learning and Teaching [SAL]	3	Yes
Youth Taobacco Survey: started in 2001	3	No

HEALTH SYSTEMS CAPACITY INDICATOR #09C (Data Capacity) Overweight/Obesity
(The Ability of the State to Determine the Percent of Children Who are Obese or Overweight)

Data Source	Does your state participate in this survey/data source? (Select 1 - 3)*	Does your MCH program have direct access to this electronic database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Pediatric Nutrition Surveillance System (PedNSS)	1	No
WIC Program Data	3	Yes
Other: Rhode Island Health Interview Survey	3	Yes
Imm. Program Data for Kindergarteners: started 2002	3	Yes

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.
