## FORM NOTES FOR FORM 3

- Increase in projected FY05 budget is due to the following factors:
- increased revenue from new specialty outreach and telemedicine clinics for CSHS
  - increased age of eligibility to age 21 for CSHS
  - CSHS is reimbursing physicians and pharmacists at a higher cost for services provided.

## FORM NOTES FOR FORM 4

- Increase in projected FY05 budget is due to the following factors:
- increased revenue from new specialty outreach and telemedicine clinics for CSHS
  - increased age of eligibility to age 21 for CSHS
  - CSHS is reimbursing physicians and pharmacists at a higher cost for services provided.

1. State MCH Administration:  
*(max 2500 characters)*

The South Dakota Title V Maternal and Child Health Services Block Grant is administered through the Department of Health Division of Health and Medical Services Office of Family Health (OFH). The program conducts a statewide assessment of needs, develops policies, plans, and provides for programs to improve the health of women, infants, children, adolescents, and families in South Dakota. OFH is also responsible for WIC, family planning, MCH, CSHCN, perinatal health, newborn metabolic and hearing screenings, and public health nutrition. Additional information regarding MCH programs as well as other programs administered by the division (i.e., communicable disease, immunizations, Ryan White, health promotion, and disease prevention programs can be found at [www.state.sd.us/doh](http://www.state.sd.us/doh).

a. Direct Medical Care and Enabling Services:  
*(max 2500 characters)*

(1) CSHS Program: Provide care coordination and financial assistance to CSHCN at four regional sites around the state. Pediatric specialists, registered nurses, social workers, and dietitians offer a multi-disciplinary approach to family-centered, community-based services for children and families.(2) Bright Start Toll-Free Number: Provide referrals for service, answer questions or offer general information regarding early childhood issues.(3) Respite Care: Facilitate provision of respite care services for families who have children with special needs.(4) Family Planning: Provide reproductive health services such as education, health screenings and referrals, pregnancy testing, birth control supplies, and infertility counseling and referrals.(5) SD Parent Connection: Facilitates and provides parent support and education to families with CSHCN.

b. Population-Based Services:  
*(max 2500 characters)*

(1) School Health: Work with DOE to implement coordinated school health curriculum in schools. (2) Immunization: MCH-funded nurses administer a large number of publicly funded vaccines and coordinate activities to raise public awareness about the importance of immunizations.(3) Injury Prevention: Coordinate injury prevention activities for infants and children (i.e., safety belts/seats, bicycle safety, poison prevention, etc.) and adolescents (i.e., intentional and unintentional injuries, seat belt usage, drinking/drug use, etc.). (4) Newborn Screening: Screen infants born in South Dakota for metabolic diseases prior to hospital discharge and provides referral to follow-up services for infants as needed.

c. Infrastructure Building Services:  
*(max 2500 characters)*

(1) Community Health Services/Public Health Alliance: Fund Title V/MCH public health services in all 66 counties in the state. **LIST OF MCH PRIORITY NEEDS**

[Sec. 505(a)(5)]

**STATE: SD FY: 2005**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women," and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce unintended pregnancies.
2. Reduce infant mortality.
3. Improve pregnancy outcomes.
4. Reduce morbidity and mortality among children and adolescents.
5. Improve adolescent health and reduce risk-taking behaviors (i.e., intentional and unintentional injuries, dietary habits, physical activity, tobacco use, alcohol use, and other drug utilization).
6. Improve the health of, and services for, children with special health care needs through comprehensive services and support.
7. Improve and assure appropriate access to health services that are focused on families, women, infants, children, adolescents, and children with special health care needs.
8. Improve state and local surveillance and data collection and evaluation capacity.
9. Reduce childhood obesity.

SP #     1    

**PERFORMANCE MEASURE:**

Percent of women who smoked prior to pregnancy and report they stopped during pregnancy.

**STATUS:**

Active

**GOAL**

Improve pregnancy outcomes by decreasing use of smoking tobacco by women during pregnancy.

**DEFINITION**

Percent of women who smoked prior to pregnancy and report they stopped during pregnancy.

**Numerator:**

Women surveyed who report they stopped smoking during pregnancy.

**Denominator:**

Women surveyed who reported smoking prior to pregnancy.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

South Dakota Perinatal Health Risk Assessment survey data

**SIGNIFICANCE**

Smoking during pregnancy increases the risk of miscarriage, stillbirth and preterm/low birth weight babies. Improved pregnancy outcomes have been demonstrated when mothers significantly decrease or cease smoking during pregnancy. A study of Sudden Infant Death Syndrome (SIDS) showed that maternal smoking during pregnancy significantly increased the risk of death from SIDS two-fold.

SP # 4

**PERFORMANCE MEASURE:**

The rate (per 1,000 live births) of children under age one who die as a result of Sudden Infant Death Syndrome.

**STATUS:**

Active

**GOAL**

To reduce infant deaths in South Dakota due to Sudden Infant Death Syndrome (SIDS).

**DEFINITION**

Number of infants who die as a result of SIDS.

**Numerator:**

Number of infants who die as a result of SIDS.

**Denominator:**

Total number of live births in South Dakota.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

State vital records data

**SIGNIFICANCE**

From 1995 to 1998, SIDS deaths averaged 18 deaths out of 82 infant deaths per year. From 1995 to 1998, the Native American deaths due to SIDS averaged 4.6 per 1,000 live births compared to the average White SIDS death of 1.3 per 1,000 live births. SIDS is occurring over three times as much in the Native American population than in the White population. One of the most important things to help reduce the risk of SIDS is to place healthy babies on their back to sleep. Education is an important piece to help reduce SIDS deaths among infants in the state. Activities related to this performance measure will impact infant mortality related to SIDS in South Dakota.

SP # 5

**PERFORMANCE MEASURE:**

Percent of pregnancies which are unintended (mistimed or unwanted) and result in live birth or abortion.

**STATUS:**

Active

**GOAL**

Improve pregnancy outcomes by reducing the number of unintended pregnancies.

**DEFINITION**

Percent of pregnancies which are unintended (mistimed or unwanted) and result in live birth or abortion.

**Numerator:**

Calculated number of unintended pregnancies (percent reporting unintendedness on survey multiplied by resident pregnancies resulting in one or more live birth plus resident abortions occurring in South Dakota for other than medical reasons).

**Denominator:**

Number of resident pregnancies resulting in one or more live birth plus resident abortions occurring in South Dakota.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

South Dakota Perinatal Health Risk Assessment and state birth records data.

**SIGNIFICANCE**

Unintended pregnancies are associated with maternal health risk behaviors, low use of preventive health measures including early prenatal care, child abuse and dependency on welfare. There is a great risk for complicated births and poor pregnancy outcomes including infant mortality, birth defects and low birth weight infants.

SP # 7

**PERFORMANCE MEASURE:**

Percent of high school youth who self-report tobacco use in the past 30 days.

**STATUS:**

Active

**GOAL**

To decrease the incidence of tobacco use and the associated health risks that accompany adolescent tobacco use.

**DEFINITION**

**Numerator:**

The state's high school fall enrollment multiplied by the percent of students self-reporting tobacco use in the past 30 days according to YRBS.

**Denominator:**

The state's high school fall enrollment.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Youth Risk Behavior Survey (YRBS) and DECA.

**SIGNIFICANCE**

Reduce tobacco use by adolescents. Smoking is responsible for one in six adult deaths in the U.S. and is the single most preventable cause of death. The 1997 YRBS indicates that 44% of the respondents reported smoking one or more cigarettes in the past 30 days. There is little variation between all grades surveyed in the YRBS. Initiation of smoking usually begins between grades 6 and 9, with minimal initiation after high school which supports the ongoing collaboration between DOH and DECA to collaboratively address adolescent tobacco use.

SP # 9

**PERFORMANCE MEASURE:**

Percent of school-aged children and adolescents who are overweight or obese.

**STATUS:**

Active

**GOAL**

To decrease the number of school-aged children who are overweight or obese.

**DEFINITION**

Number of school-aged children who are overweight or obese.

**Numerator:**

Number of children screened in the state's school height-weight report multiplied by the percent above the 95th percentile for 5-19 year olds on the state's School Height and Weight Report indicating overweight.

**Denominator:**

Number of children age 5-19 years screened in the state's school height-weight report.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

19-3. Overweight or obesity in children and adolescents.  
Reduce the proportion of children and adolescents aged 5-19 years old who are overweight or obese to 5%.

**DATA SOURCES AND DATA ISSUES**

School Height-Weight Report - Data collection for the School Height-Weight Report for SD students was started during the 1998-1999 school year. The 1998-1999 data was analyzed using the standard at the time. The 1999-2000 and 2000-2001 data was analyzed using the new CDC growth charts. State Pediatric Nutrition Surveillance System (can currently obtain PedNSS data for children on DOH, Rosebud, Cheyenne-Eagle Butte, and Standing Rock WIC programs). Youth Risk Behavior Survey - height-weight data for elementary, middle and high school-aged children.

**SIGNIFICANCE**

Obesity is a risk factor for many chronic conditions including cardiovascular disease, hypertension, diabetes, degenerative joint disease, and psychological problems. Overweight can result from excessive energy intake, decreased energy expenditure or impaired regulation of energy metabolism. Weight-for-height during early infancy predicts weight-for-height during late infancy and childhood.

SP # 11

**PERFORMANCE MEASURE:**

Percent of children age 2-5 who are overweight or obese.

**STATUS:**

Active

**GOAL**

To decrease the number of children age 2-5 who are overweight or obese.

**DEFINITION**

Children age 2-5 who are overweight or obese

**Numerator:**

Number of children aged 2-5 years of aged screened by the South Dakota Department of Health WIC Program multiplied by the percent above the 95th percentile.

**Denominator:**

Number of children age 2-5 screened by the South Dakota Department of Health WIC Program.

**Units:** 100 **Text:** 1

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

South Dakota Pediatric Nutrition Surveillance System (PedNSS) annual report.

**SIGNIFICANCE**

Obesity is a risk factor for many chronic conditions including cardiovascular disease, hypertension, diabetes, degenerative joint disease, and psychological problems. Overweight can result from excessive energy intake, decreased energy expenditure or impaired regulation of energy metabolism. Weight-for-height during early infancy predicts weight-for-height during late infancy and childhood.

SP # 12

**PERFORMANCE MEASURE:**

Percent of infants who are breastfed at least 6 months

**STATUS:**

Active

**GOAL**

Increase the percent of infants who are breastfed at least 6 months.

**DEFINITION**

Number of infants who are breastfed at least 6 months.

**Numerator:**

Number of infants in the survey who are breastfed at least 6 months

**Denominator:**

Number of resident South Dakota births surveyed.

**Units:** 100 **Text:** 1

**HEALTHY PEOPLE 2010 OBJECTIVE**

16-19b: Increase the proportion of mothers who breastfed their babies at 6 months to 50 percent.

**DATA SOURCES AND DATA ISSUES**

South Dakota Perinatal Health Risk Assessment Survey

**SIGNIFICANCE**

Breastfeeding provides the most complete nutrition for infants and has many benefits to both mother and infant including decreased new cases and severity of diarrhea, respiratory infections, and ear infections. Infants who are breastfed have less overweight and the overweight rate is improved the longer the infant is breastfed.

SO # 1

**OUTCOME MEASURE:**

The Native American infant mortality rate per 1,000 live births.

**STATUS:**

Active

**GOAL**

To reduce the Native American infant mortality in South Dakota.

**DEFINITION**

**Numerator:**

Number of deaths of Native American infants from birth through 364 days of age.

**Denominator:**

Number of live births to Native American mothers.

**Units:** 1000 **Text:** Rate per thousand

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

State vital statistics

**SIGNIFICANCE**

Infant mortality rate is a traditional indicator of general health status. Native American infant mortality has been a long standing public health problem. Using a five-year rolling average, the discrepancy in Native American and white infant mortality has increased over the past five years from 2.30 in 1991 to 2.61 in 1996 while overall infant mortality rates for the state have decreased from 9.4 to 5.7. Since Native American live births compose 15 percent of the live birth cohort, South Dakota must reduce the Native American to white discrepancy in infant mortality to achieve significant improvements in infant mortality.

**Year:** 2005

**Field Note:**

Numerators are based on hospital discharge data obtained through the South Dakota Association of Healthcare Organizations for the years 1999-2001. This data contains community hospital discharge data only for approximately 90 percent of the South Dakota resident discharges. After bringing in the non-community hospital discharges, the percent of total discharges in the state represented by this data will be reduced to approximately 70. The numerators were adjusted to reflect this deficiency for each of the years 1999-2001 for the community hospitals. The actual discharge data for 1998 and 2002 was not available. The numerator used for 1998 is 1999 estimated discharges and the numerator for the 2002 data is 2001 estimated discharges. 1998 and 1999 denominators are Census Bureau population estimates for the appropriate years. 2000 through 2002 denominators are 2000 Census data. Discharge data was selected using admission dates and principal diagnosis code of ICD-9-CM 493.

8. **Section Number:** Indicator 09A  
**Field Name:** HSIRace\_JuvenileCrimeRate  
**Row Name:** Rate (per 100,000) of juvenile crime arrests  
**Column Name:**  
**Year:** 2005  
**Field Note:**  
State FY 2003 data are available for children less than 18 years of age from the SD Unified Judicial System. Those 18 years of age and older are considered adults. Due to the way race data is collected and entered into the system, the rates by racial breakouts do not accurately reflect the actual rates. This also disproportionately inflates the "Other and Unknown" column.
